

SCOTT-BROWNE says that every mother's son and daughter of you need a knowledge of SHORTHAND to facilitate your studies as well as aid INSTRUCTION BY MAIL to remuneration, and you can get such for the simple sum of \$11.50 or learn by a set of books alone costing \$3.55, and make a success of it as hundreds of others have done

Mr. Joseph Stockton Roddy of Princeton, who is paying part of his expenses by the use of shorthand, says:—"I taught myself the *American Standard* system by the aid of Scott-Browne's text books while in a small town in Pennsylvania, and found the art of immense benefit to me. I use it constantly in taking lectures in college and seminary work, and could not get along, now, without it. The main advantage is in the ability to keep up with the lecturer and so be able to get exactly what they means. I consider the *American Standard* the best of the three or four systems I have attempted to learn"

George D. Hedian of Wilkesbarre, Pa., learned shorthand during vacations and became stenographer to Bancroft, the historian, receiving \$25 per week salary for morning's work, and afternoons attended the Georgetown Law School, and after graduating began the practice of Law and Stenography in his native town, shorthand paying his entire expenses.

Send to the editor of *Brown's Phonographic Weekly* for Price List of Books and circular of commendations and terms.
