WARREN'S IMPROVED
Fire & Water Proof Composition ROOFS.

S. M. & C. M. WARREN.....Cincinnati.
WARREN & BURNHAM.....Philadelphia.
C. M. & H. M. WARREN.....St. Louis.
WARREN & BROTHER.....Buffalo.

THE Proprietors of this invaluable improvement in roofing have been engaged in its manufacture in the principal cities of the West for the last 7 years, and in that time have covered the greater portion of the building that have been erected in those towns where they have been operating—including the finest public buildings, stores, manufactories, residences, &c.

By the manner in which these roofs have stood the most severe tests of fire and water, brought against them under the most favorable circumstances, they have shown that they fully merit the praise that has been so bountifully bestowed upon them by the most experienced, intelligent and practical men of all classes and professions.

Our object in this advertisement is to interest those persons in this city and vicinity who may not have become acquainted without roofing, to call and examine specimens of our work assuring them that we are ever happy to exhibit the same for their inspection or to impart all desired information respecting it.

We have now been established in this city nearly 3 years and have covered most of the first-class buildings that have been erected here during the time.

Prior to and since we commenced the manufacture of our roofs, others have been engaged in different sections of the country in putting on roofs, which in some general features bear a resemblance to ours, but in 7 essential points differ materially.

The abortive and all attempts at imitating our valuable invention by worthless substitutes, may have led some casual observers to come to the conclusion that roofs would in time likewise fail. That this opinion is founded in error we are prepared to prove by testimony of the most conclusive and of such a character as cannot fail fully to convince the most skeptical. The liberality of the patronage that has been so liberally extended to us by the citizens of Buffalo and the country surrounding, we solicit a continuance of the same pledging ourselves to execute all work entrusted us with the same care and promptness as heretofore.
