

To those who pay in advance, in one payment, the paper is sent to one office, we will send 10 copies for \$14; 20 copies for \$26; 50 copies for \$60; 100 copies for \$100, for one year.

Valuable Merino Sheep.—Our agricultural readers are no doubt many of them aware of the fact that there are many flocks of sheep in this county, which hardly yield wool enough to pay the expense of keeping them.

His stock looks like a fine specimen of the breed, and is worth a good deal more than the average of the county.

It is very appropriate that the Thaca Journal should speak in favor of the Col. Webb, of the N. Y. Courier and Enquirer, since it sympathizes so strongly with his position to the Constitutional Reform Convention.

Since the fire of last week, many inquiries have been made relative to the tenures by which the supply of water for the public citizens, is held by the village, and whether some more efficient plan than an extension of those cisterns cannot be introduced and used.

We presume all know that the village obtains the water supplying the large cisterns by courtesy, having no right to enforce the furnishing of it, should the owners of the mill property on Owego street, see fit at any time to deny it.

We have not a doubt that as long as that property remains in its present owners, an abundant head of water will be obtained; but time may yield the right to allow it to others; and should the present system of cisterns be carried out in full, the good people of our village may at some future date be called upon to pay a round sum for that which they now receive freely by sufferance.

We understand that the right to demand a supply from that source cannot be purchased, the present owners, expressing a perfect willingness to allow the quantity asked for the use of the village without charge, but desiring to sell the same.

We ask then, with a large additional number of cisterns constructed, what would be the benefit to the village from them, should the supply of water be denied?

We understand that some years since, surveys and estimates by proper persons were made as to the practicability of constructing a reservoir and distributing water through the village by the agency of conducting pipes and hydrants.

The committee appointed to examine the plan, we are informed, reported that for \$7,000 or \$8,000 a reservoir might be constructed, with a main line of pipe extending from it to the centre of the village, and for a minor expense branches laid sufficient to reach every part of our village.

It seems that an extension of the cisterns under the present system is but a palliative, not a remedy. Every one knows the extent of the Croton water works in New York, and the efficacy of hydrants in the extinguishment of fires there.

In Poughkeepsie, the place of our former residence, a village in 1834 of about 6,000 inhabitants, so important was the adequate security of a supply of water deemed, that works were constructed upon the summit of an eminence, near one mile from the centre of the village, and pipes connecting therewith laid through the principal streets.

The supply of water for the reservoir is there obtained by machinery pumping the water from a creek up an elevation of about 150 feet into the reservoir at an annual expense of \$200 for the use of such machinery. We do not now recollect the entire cost, and only know that a considerable portion of it arose from a defective construction of the reservoir at first, and the peculiar formation of the ground on which it was necessary to place it.

Here none of these difficulties can exist; for an ample supply can be obtained to flow into a reservoir without assistance or cost, and the length of pipe necessary to reach the compact part of the village would be less than one half that used. In 1839 the water works at Poughkeepsie were the means of saving perhaps half a million of property in one single instance, as without them all human aid would have been utterly powerless.

We are advocates for an economical expenditure of money by corporations, but think that with less bridges and public buildings, and a more efficient means for the extinguishment of fires, we should be more prosperous, and feel additional security.

FLORIDA.—The New Democratic State. The first Election in Florida, has resulted (says the Albany Atlas) in the success of the democratic ticket. Wm. D. Moseley, the democratic candidate for Governor, has been elected by a majority of 29, and David Levy, Democrat, is elected to Congress by over 700 majority. The Legislature is democratic by a majority of 29 on joint ballot. The returns show in West Florida, 3 Democrats to 2 Whigs; Middle Florida, 4 dem. to 2 whigs, and East and South Florida 5 dem. to 1 whig for the Senate; the West returns 5 dem. to 7 whigs, the Middle 12 dem. to 2 whigs, and East and South 13 dem. to 1 whig to the House; making 26 democratic majority on joint ballot. The new U. S. Senators will of course be Democrats; and 1 Democrat to the House of Representatives.

The advertisement of the Comptroller for the redemption of broken Safety Fund Bank notes, will be found in another column.

A Child of Two Mothers.—A very singular law case has been pending before one of the Courts in New Orleans, in which a child is claimed by two sets of parents. The one asserting that the child was born in New Orleans in 1835, and the other that he was born in New York, in 1837. The testimony adduced in the trial, says a New Orleans paper, is very conflicting. The case was brought up by a writ of habeas corpus—the parties were John and Maria Paul upon the one side, and Mrs. Hughes on the other. The Court decided that Mrs. Paul was the mother of the child, and in virtue of which decision, she took him under her maternal protection.

The above case is a singular one, and its parallel can only be found in the one of the whig party, which through its organs, is attempting to deny its father, James Watson Webb.

William J. Shaw, Esq., of this Village, has been appointed by Gov. Barry, a Commissioner for the State of New York to take proof and acknowledgment of deeds, mortgages, or any instruments of writing under seal, to be used and recorded in the State of Michigan; and to administer oaths, or affirmations to any testimony to be used in any court, or for any purpose in that State.

Mr. S. is a young Lawyer and has lately commenced practice among us, although his studies were prosecuted in this village. His Business Card may be found in another column.

Strange.—Sugar is now used in England as the best manure for turnips. We should think it must be rather expensive. How can they afford to use sugar thus? It brings it 1000 per cent. over what is necessary to bring it low enough to use for such purposes.

A game of chess, commenced last October, is now in progress through the columns of a paper in New York and one in Philadelphia, by citizens of each place. The 292 move has been reached on the 13th inst.

The undersigned improves this opportunity to tender to the public the following list of his professional services in saving his clients from the flames on the morning of the 10th inst, and especially his liberal assistance in that respect, on the morning of June 16, 1845.

Still Another Disastrous Fire at Pittsburgh.—About half past 3 o'clock on the morning of the 12th inst., flames were seen issuing out of the stable of Mrs. Verne, corner of Exchange and Brewery alleys, between Long and Penn streets, and St. Clair and Broad streets, and soon spread to surrounding buildings.

From Mrs. Verne's stable the fire communicated to the house of Mr. McCulloch, which was also destroyed. From there it direct along Exchange alley, burned a stable and partly destroyed W. & M. Micheltree's distillery, where it stopped in that direction. Several shops and outhouses, of one sort or other, were burned on this row.

The fire from the distillery, which was burning on a street, destroying a large frame which would not learn the name of.

From the three-story brick house of Mr. Samuel M. Cleon was considerably damaged.

From Penn street, the fire spread to the house of Mr. James M. Allen, the frame dwelling of Mr. Verne, and the dwelling of Mr. White, extending to the corner of Brewery alley, were consumed.

Life Insurance.—When the National Loan and Life Assurance Society (of London) commenced an Agency in this city a few months ago, it was feared by many that while the society of Life Insurance was new among us, and so very few of our citizens had regarded it with favor or felt its utility, the establishment of the London institution with so gigantic a capital would interfere with our newly formed Companies, and retard their progress.

The gentleman sent out from London, (Hon. J. Leader Starr) with the powers of the Court of Directors delegated to establish this Institution in this city, has just returned, and has a report of a fair success in a reference to the spread of such Companies in his own country, and the strong fact that now there are in England over a hundred Life Insurance Companies in full operation—the business of such is greater and more prosperous than when there are but few.

Six or six months have since then elapsed, and while, as we are informed, this London Company has received a fair share of public patronage, the Mutual Life Insurance Company of this city has not been able to obtain an increase of policies issued from their office, and now they amount to nearly one hundred per cent. So much for the spread of such societies in each of the two countries.

The last Annual Report of the Society is now circulating here. The meeting was held in London 14th May last. The affairs of the Institution are stated to be in a most prosperous and healthy condition; and the report was received by the Proprietors present—as it will not doubt be reviewed by the friends of the Society in this country—with the utmost satisfaction.
