Valuable Medicine for Coughs and Consumptions

THE uncommon virtues that Andersons' Cough Drops and Peculiar Powders are well known to possess for the cure of Colds, Coughs, and other affections of the breast and lungs leading to Consumptions, is sufficiently proved from the fact, that they have now been in use for seven years, and that the demand for them is still rapidly increasing. Thousands have experienced the happy effects of this Healing Balsam, and great numbers have voluntarily given certificates of the benefits received in Consumptive Complaints of long standing, even where their cases were almost hopeless, and where they had been given up by their physicians as incurable. A reference to the certificates accompanying each bottle, given by those of the first respectability, will satisfy every unprejudiced mind of the wonderful cures performed by this valuable medicine. Thousands have shortened their days by neglecting Coughs when first attacked, which have soon terminated in a sealed Consumption, and proved fatal. Scarcely a case of Colds, Coughs, pain in the side, difficulty of breathing, want of sleep arising from debility, or even consumptions, but may be relieved by a timely use of the Healing Balsam. Each Dollar Bottle of this medicine contains about 40 doses, which proves them to be a cheap medicine, considering their virtues.

Perry's Patent Vegetable Dentifrice.

FOR Cleaning and Preserving the Teeth and Gums.—The Proprietor of the above article, from a full confidence in its virtue, offers it to the public, with such recommendations as he thinks will insure its success. It has been tested by an extensive circle of impartial persons, who have pronounced it the best article of the kind ever offered to the public. It is free from all acid, or any other ingredient that would tend to destroy the enamel of the Teeth or injure the Gums. Carbon, or Charcoal, has long been held in high estimation by a large portion of the community, but its effects on the Gums are highly injurious; from its extreme harshness, it has a tendency to irritate and discolor them. The above article is directly opposite in its effects: from the nature of its composition, it hardens the Gums and imparts to them a rich and beautiful color—it neutralizes the acidity which is exhaled from the stomach, and prevents the accumulation of tartar upon the Teeth. To those persons who wish to preserve the brightest ornament of their nature, a hand some set of Teeth, the above article is strongly recommended.
