

## St. Lawrence County Savings Bank

79 State Street  
Ogdensburg, New York

JAMES E. KELLY, President.

St. Lawrence County Savings Bank, established May 1st, 1909, was the pioneer in Northern New York in paying interest to its depositors. Two thirds of its deposits go to borrowers in St. Lawrence County who use it to purchase farms and homes or to improve the same.

Its resources January 1st, 1923, were over a million and one-half. Its mortgage loans were \$745,000.00. The amount due them Jan. 1 last, over four thousand depositors, was \$1,440,000.

During its lifetime the management has not changed, Mr. James E. Kelly being promoted to the presidency four years ago and Mr. James F. Jillson to the treasurership.

Its present officers are:

- JAMES E. KELLY, President.
- GRANT C. MADILL, 1st Vice-Pres't.
- THOMAS SPRATT, 2nd Vice-Pres't.
- JAMES F. JILLSON, Sec'y-Treas.

Executive Committee:

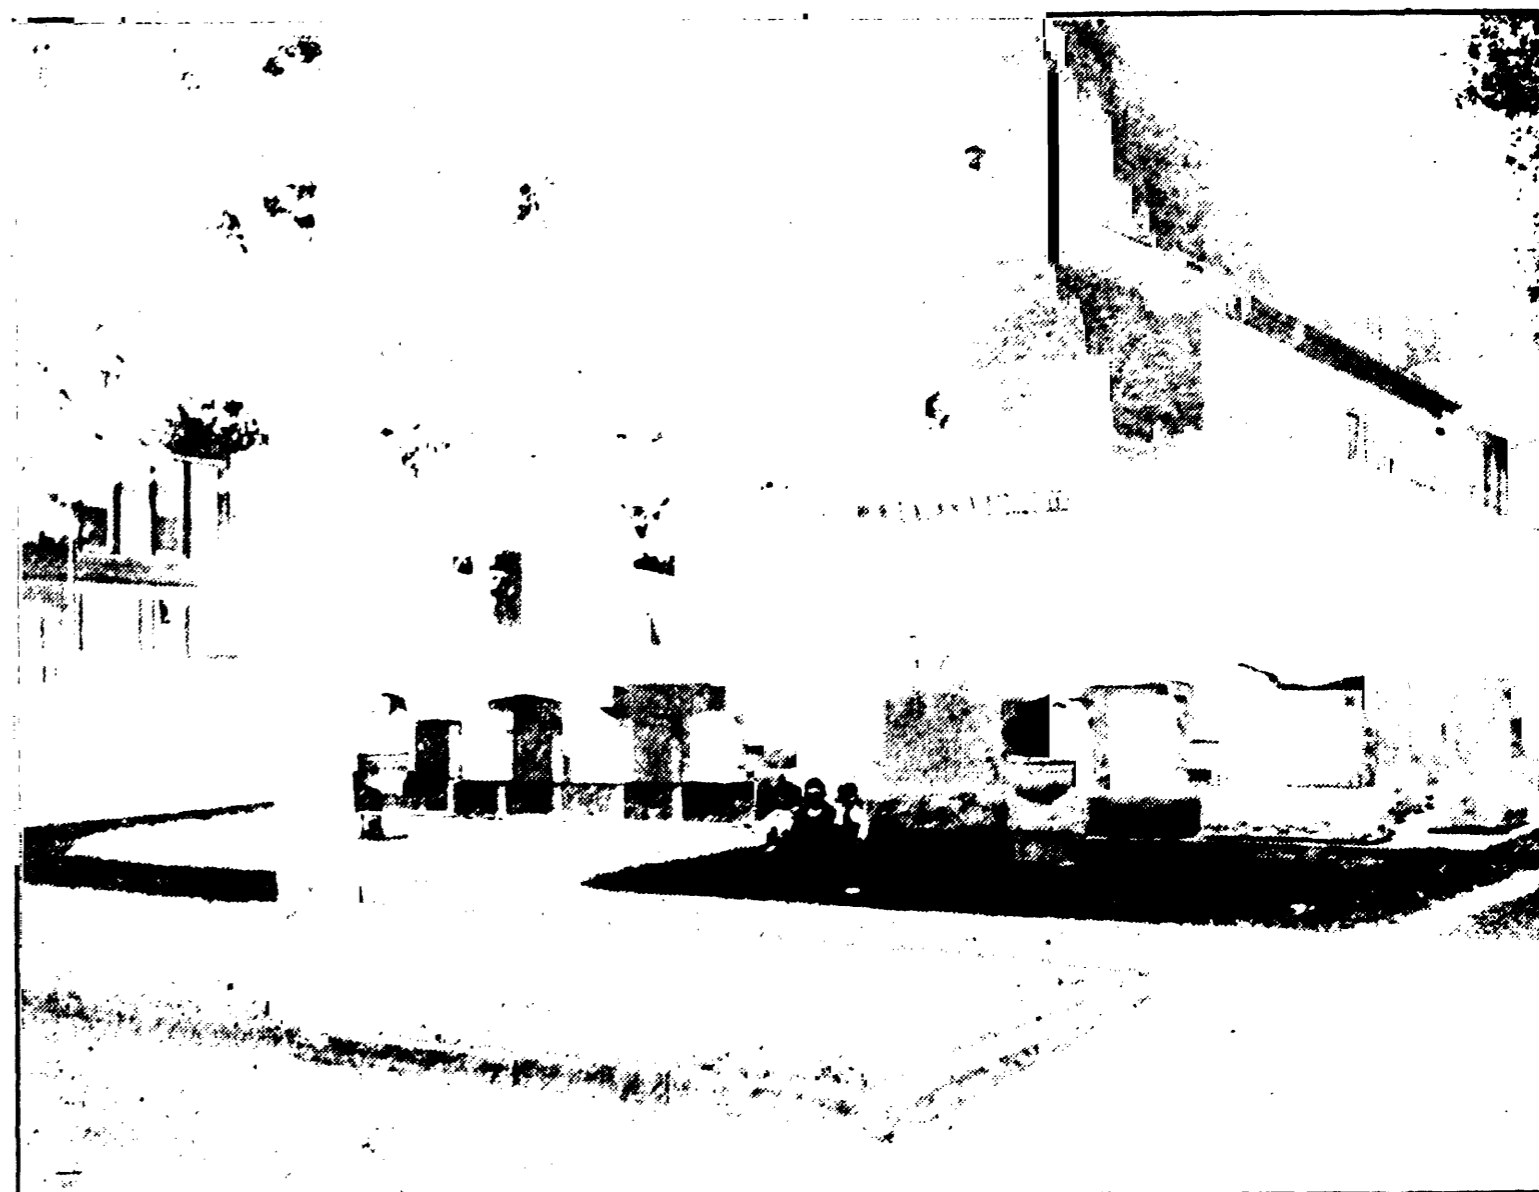

- GEORGE F. DARROW, Chairman,
- FELIX HULSER,
- CHARLES D. RANGLES,
- SAMUEL W. LEONARD,
- R. J. DONAHUE.

## R. J. BOWERS, MARBLE WORKS

Cor. State and Lafayette Streets, Ogdensburg, N. Y.

R. J. BOWERS

Ogdensburg has one of the best Monumental Works in Northern New York, situated on State street, at the corner of Lafayette.

R. J. Bowers, the proprietor, is progressive in his line of business. Being a first-class mechanic himself, he knows how to execute a monument from the natural rock to the finished product.

Eighteen years ago he started in business with his brother, W. A. Bowers, who had been connected for several years as foreman in the marble works located opposite the post office. Together they leased the building at the corner of Ford and Caroline streets, where they continued in business until 1920.

The State street marble works opposite the post office, conducted by W. L. Evers of finding the competition too strong, in 1907 turned over their stock to Bowers Bros. at cost and retired from the business.

Three years ago W. A. Bowers sold his interest in the business to R. J. Bowers and after a year's rest, accepted the position as Superintendent of the Ogdensburg cemetery.

During the Ford street location the small R. J. Bowers plant on the corner of State and Lafayette was converted into an up-to-date Monumental Works, erecting a residence and garage adjoining in Lafayette street.

The beautiful Memorials erected by Bowers Bros. in the cemeteries of Ogdensburg and vicinity show that they are not only skilled workmen but also experienced in judgment, as to a suitable Memorial for any size of lot.

Mr. Bowers deals also in Bronze Memorial Tablets. There is a fine example of his art in the beautiful Memorial Tablet erected last summer in Baker Hill, N. Y., in memory of the Civil War veterans of the town of Mendon.

We congratulate Mr. Bowers on his success, for we know he is worthy of the patronage and confidence he enjoys from the people.

## FRUITATIVES LIMITED, Ogdensburg, New York

One of the business houses which has done a great deal to make the name of Ogdensburg known throughout the country is FRUITATIVES LIMITED, whose product, Fruit a-tives and Sootha-Salva, are standard in all parts of the continent.

Starting in a small way in Canada a few years ago where they soon became famous, the concern opened its American office in 1914 in Ogdensburg. It did not take long for the concern to gain a foothold in this country and their popularity has grown by leaps and bounds. It is hardly possible to pick up a newspaper or any standing which does not carry an advertisement of Fruit a-tives. Today the concern spends thousands of dollars in advertising, and its booklets and pamphlets are sent out by the million.

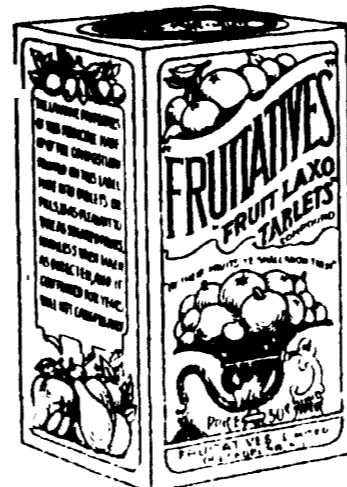

Fruit a-tives is known in practically every home in the United States and Canada, and a splendid foreign trade is being enjoyed.

The plant of the Fruitatives Limited is located in a pretentious home in State street where a large force of competent employees is maintained. Mr. W. B. Stuart, who is the head of the concern in the United States, is one of the best known men in the city. He is a man of standing and ability and it is due to his genius that the wonderful business has been developed. The concern has already contracted to build a large addition to its already large laboratory.

What are "Fruit a-tives"? What are they made from, and what diseases, or dis-

W. B. STUART, United States Manager.

eased conditions of the body, is this medicine likely to benefit?

"Fruit a-tives" is a discovery by an English physician who experimented with fruit juice for a great many years, that is, he worked at this for over fifteen years. The fruit experimented with was the ordinary fruit grown in this country, or the common fruit of every day use, such as the juice of apples, the juice of oranges, the juice of pears, the juice of peaches, the juice of plums, and the small fruits such as grapes and currants.

It was found that if a large amount, say, eight ounces of apple juice or orange juice or pear juice or peach juice was given to an ordinarily healthy person, three times a day, before meals, that this juice had a very distinct action on the human body, that is, it acted on the liver as a distinct stimulant, and caused an increased flow

of bile, and this bile acted on the intestines and produced a purgative or aperient action. Also it acted on the kidneys and it was a distinct and decided diuretic, or kidney stimulant, and produced more action on the part of the kidneys, that is, it increased the flow of urine and it increased the solids of the urine as well as the liquids. It was, in other words, a decided kidney stimulant, or true diuretic. Also, it was found that it acted on the glandular system of the body, and that this action was most pronounced on the glands of the skin, and it increased the flow of perspiration, or the skin action, very materially. It increased the action of all the glands of the body, and it was found to be a decided glandular stimulant. In these experiments only freshly expressed juice, that is, juice of fresh fruit, freshly expressed, was used, and it was found that if the juice was not fresh the same action would not occur.
