Major development on Demsar Blvd detailed

by Dan McClelland

Village and town leaders were excited over the announcement last week of a major development project planned along both sides of U.S. 9 and 177 Demars Blvd. Both the Village of Tupper Lake and the Town of Quintette have signed agreements with the developer involved, the Oval Wood Dish Co., and are hopeful the project will bring much-needed economic development to the lake region.

The development is expected to include a mix of commercial and residential spaces, along with a new park and nature preserve. The area is known for its scenic beauty and is a popular destination for tourists, offering opportunities for hiking, boating, and fishing. The project is expected to create jobs and stimulate the local economy, benefiting both the village and the town.

Developer Oval Wood Dish, a company that specializes in the restoration and renovation of historic buildings, has a proven track record of successfully transforming old structures into modern, functional spaces. This new project builds on Oval Wood Dish's commitment to preserving the character of the region while meeting the needs of contemporary life.

Local officials anticipate that the development will not only enhance the aesthetic appeal of the area but also provide much-needed housing and commercial options for residents. The project is expected to be a major boost to the local economy, creating new opportunities for businesses and attracting visitors to the area.

The partnership between Oval Wood Dish and the Village of Tupper Lake, along with the Town of Quintette, represents a collaborative effort to harness the potential of this unique location. It is a testament to the shared vision of creating a thriving, sustainable community that respects and leverages its natural and historical assets.

The development is estimated to be completed in the next few years, bringing a new wave of growth and development to the area. With its focus on sustainability and preservation, this project is expected to leave a lasting legacy, enriching the landscape and experiences of the region for generations to come.

For more information on the project and updates, please visit www.ovalwooddish.com. To stay informed about the progress, follow Oval Wood Dish on social media and sign up for their newsletter. Together, we can look forward to the transformation of this area into a vibrant hub of activity, where nature and culture come together in harmony.
