A Great Step Forward

The water department has been authorized by the village board to enter into an agreement with the people of Upper Z. to increase the pressure of the water in the new main. This agreement is to be made with the result of the vote of the people in the area, and the water pressure will be increased in that part of the village.

Thirty years ago the village of Massena purchased the water department, and under Republican and Democratic rule, it has been the policy of the average housewife to buy water at a price. Now, the demands for water are increasing, and so the village board has decided to increase the pressure of the water in the new main, as it is called.

But there are other sections of this village where the water pressure is low. This is dangerous, for there is a great deal of money in the water department which can be converted to cash in this way.

The village will receive a lot of complaints about this situation. There are holes and breaks. The village's money and time will be eliminated, and the village will have a lot of trouble. As a result, the village board has decided to increase the pressure of the water in the new main.

The proposition. It derives its income from the sale of water, and since its inception, the village has been struggling to keep up with the demands for water. The village board believes that it is necessary to increase the pressure of the water in the new main, in order to meet the demands of the people in the village.

Minimum charge for water is $3 a quarter, and that's just $1 a month, or less than 25 cents a week, or just about 10 cents a day. If the area outside the village wants water, it will be sold at the same price.

The village board and the water board will have full support of the community in moving ahead to increase the pressure of the water in the new main. The village board is confident that this will be a success, and that the village will be able to keep up with the demands for water.

Here’s What to Do in Case of Severe Storms

When deciding where to live, there are certain things to consider. One of the most important things to consider is the possibility of severe storms. In this article, we will discuss what to do in case of severe storms.
