PECÓNIC

Robert F. O'Connell is confident in his home with a fine tree of tulip poplars in the front yard. It is reported that about 12 of these trees are going to be removed from the area by the town. The town is working on a project to improve the appearance of the area. Mrs. O'Connell manages the finances of the town and is working to improve the area. The town is working on a project to improve the appearance of the area.

W. H. Rowell and J. E. Rowell of North City, New York, have announced their engagement to be married on September 15th. The couple will reside in New York City after the marriage.

Mattituck

A committee from the Mattituck section of Mattituck arranged a dinner of honor last week for several of the members of the Mattituck Fire Department who were on active duty during the war. They were given a hearty welcome and a warm reception by the people of Mattituck.

East Marion

The King's Daughters Circle had an open house last week for the benefit of the Mattituck Fire Department. A large crowd was on hand to support the cause.

The Mattituck Fire Department was presented a new fire engine at a ceremony held last week. The engine was presented by the town and the people of Mattituck.

New Light Sails

Insect Feasts in Kansas

Madison, Kans.—The drought and heat of the summer have brought about a new form of insect feast in Kansas. The locusts and grasshoppers have been feasting on the cornfields and wheatfields. The locusts have been particularly abundant in the eastern part of the state.

120-Degree Heat Kills

Grasshoppers and crickets were the victims of the heat. In one part of the state, a grasshopper population of 100,000 was estimated to have been killed by the heat.

Warren, Overton and Special Deputy Howell Lewis Irwin helped to round up the locusts and grasshoppers. A large number of locusts were killed by the heat.
