### Cerberus.

In Greek fable Cerberus was the three-headed dog that watches outside the entrance to Hades. Some writers assert that he had 50 heads, but generally he is said to have three, and three snakes are twisted about his neck. His cave was on the farther side of the dark River Styx, where Charon, the ferryman of the dead, landed the shades. Cerberus is supposed to welcome all entering Hades, but to seize all those seeking to escape.

Bedlam. The word Bedlam is a corruption of the word Bethlehem, which was the name of a religious house in London, converted into an asylum for lunatics in 1546. It is believed by many to be the oldest asylum for lunatics in Europe, though there is one in Spain which is said to have been founded at an earlier date.
