MALLOY & SANFORD,  
Cor. of White and Centre Sts., N. Y.

**FLAX & HEMP DRESSER.**

Send for Descriptive cir-  
cular.  
MALLOY, SARATOGA CO., N. Y., Aug. 10, '63.  
Messrs. MALLOY & SANFORD:—GENTS—  
On the 19th day of March we drew to the  
mill of N. G. Akin thirty-nine hundred and  
thirty (3930) pounds of flax straw, which he  
dressed through the Old Brake, and we re-  
ceived four hundred and eighty-one (481)  
pounds dressed flax.

We, about the first of June, drew to the  
mill of Wm. H. Buckley forty four hundred  
and ten (4410) pounds of flax straw, which  
was dressed through one of our Patent Flax  
Brakes; we received eight hundred and five  
(805) pounds of dressed flax.

The flax was grown on the same piece of  
land, and there was no perceptible difference  
in the quality of the flax, except that the por-  
tion drawn to Akin's mill was rotted in the  
fall of 1862, and that drawn to Mr. Buckley's  
mill was spring rotted, which is considered  
not as good, from the fact that it loses part  
of the oily matter from the fibre, and does  
not yield as much per ton of straw as the  
fall rotted.

You will perceive by the above statement  
that we received from Mr. Akin's mill 245  
pounds nearly of dressed flax per ton of straw  
and from Mr. Buckley's mill 365 pounds of  
dressed flax per ton, which makes 120 pounds  
per ton in favor of your Brakes.

We are recommending our neighbors to  
take their flax to one of your Brakes to have  
it dressed, although it is fifteen miles to the  
nearest one at present.

J. B. WEEKS,  
L. L. WEEKS,  
WM. H. BECKLEY.

I certify that the above statement is correct,  
as I saw the Weigher's receipts for both lots  
of straw, and weighed the dressed flax myself  
that was dressed at my mill. The flax dressed  
at Mr. Akin's mill is correct, no doubt, as the  
above gentlemen are perfectly reliable.

A FEW REASONS WHY THE  
**AMERICAN WATCH**  
IS THE BEST.

It is made on the best principle, while the  
foreign watch is generally made on no prin-  
ciple at all.

Let us look at the contrast. The foreign  
watch is mostly made by women and boys,  
by hand. While their labor is cheap, their  
work is dear at any price. Such watches are  
made without plan, and sold without guaran-  
tee. They are irregular in construction, and  
quite as irregular in movement. They are  
designed only to sell, and the buyer is the  
party most thoroughly sold. Those who  
have kept "anores," "leptines" and "Swiss  
levers" in professed repair for a few years  
will appreciate the truth of our statement.

The plan of the American Watch.

Instead of being made of several hundred  
little pieces, crammed together, the body of  
the American Watch is formed of solid plates.  
No jar interferes with the harmony of its  
working, and no sudden shock can throw its  
machinery out of gear. Secession of one  
part from another is unknown to its consti-  
tution, and in riding or any other business  
pursuit, it is all held together as firmly as a  
single piece of metal. It is just what all ma-  
chinery should be—

1st. Accurate.  
2d. Simple.  
3d. Strong.  
4th. Economical.

We not only secure Cheapsness by our sys-  
tem, but Quality. We do not pretend that  
our Watch can be bought for less than that for  
the foreign make-believe; but that for its real  
value it is sold for one half the price.

Our *Soldier's Watch* (named Wm. Ellery)  
is what its name indicates—Solid, Substan-  
tial, and always Reliable—warranted to stand  
any amount of Marching, Riding or Fighting.

Our next higher quality of watch (named  
P. S. Bartlett) is similar in size and general  
appearance, but has more jewels, and a more  
elaborate finish.

Our *Ladies' Watch*, recently brought out,  
is put up in a great variety of patterns many  
of them of rare beauty and workmanship, is  
quite small, but warranted to keep time.

Our *Young Gentlemen's Watch* is neat,  
not large and just the thing for the pocket of  
Young America.

The proof of the merits of our Watch may  
be found in the fact that we now employ over  
five hundred workmen in our factories, and  
that we are still unable to supply the constan-  
tly increasing demand.

Our *three-quarter plate watch* is thinner  
and lighter than the others we have describ-  
ed. Its fine chronometer balance is delicately  
adjusted to correct the variations caused by  
changes of temperature. These watches are  
chronometrically rated, and are the fruits of  
the latest experiments in chronometry and  
are made by our best workmen, in a separate  
department of our factory. For the finest  
time keeping qualities they challenge compar-  
ison with the best works of the most famous  
English and Swiss makers.

Yours, respectfully,  
**HORATIO BALLARD,**  
Secretary of State.

**Medical.**  
**J. B. MAYO, M. D.,**  
Medical Electrician & Physician,  
FOR CONSUMPTION  
AND CHRONIC DISEASES.

WOULD respectfully inform the public  
that he has taken rooms for a few days  
at the Park Hotel, Sandy Hill, for the purpose  
of curing diseases of Mind and Body, and of  
the Throat and Lungs. Dr. Mayo uses In-  
halation of medicated vapors, whereby the  
Medicine comes in direct contact with the  
diseased parts. In connection with Inhalation  
he uses Electricity, and Medicines when  
indicated. The discovery of Inhaling Medi-  
cated air for curing diseases of Lungs, and  
air passages, and putrid diseases, and the dis-  
covery of Electro Magnetism for the cure of  
nervous diseases are destined to shed innum-  
erable blessings on our race. These agents  
effects cures when ordinary medicines entire-  
ly fail. Those who have suffered long from  
painful and obstinate diseases, and those who  
have vainly sought relief from advertised  
medicines, and those who cannot be cured  
by other Physicians are invited to call.

Dr. Mayo can furnish testimonials from  
many eminent medical men, and can refer to  
thousands of persons for proof of his success-  
ful treatment of Consumption and other dis-  
eases. Sandy Hill, Sept. 25, 1863. 23-3t

New York, February 20, 1863.  
Messrs. White & Moore having submitted  
to me a sample of their "Malt Coffee" for  
analysis, &c.

From the result of our examination we  
are enabled to report that after giving it a  
thorough investigation, chemically we have  
not found anything in its composition that is  
objectionable, or in any way detrimental to  
health; on the contrary we believe that its  
use as a substitute for Coffee will prove  
wholesome and nutritious.

**DIASNETESH CANDY?**  
The Oriental Exhilarant and Nervine  
Compound.

THIS Eastern "GURJAN" of enchantment  
has for ages been the theme of song and  
story among the Turks, Arabs, Persians and  
Hindoos. It is a delightful and harmless  
exhilarant, a perfect substitute for Liqueurs,  
Opium, Narcotics and stimulants of all  
kinds, produces most a delightful exhilaration  
without the exhausting physical reaction  
which attends the use of other stimulants—  
It acts upon the nervous system in a most  
wonderful manner—as a medicinal agent is un-  
paralleled, curing almost instantaneously  
Nervousness, Debility, Hysteria, &c. Its  
success in the first stages of Consumption is  
most marvelous, melancholy confusion of  
thoughts, depression of spirits, &c. find im-  
mediate alleviation.

It is a great promoter of beauty, giving a  
youthful and delicate expression in the coun-  
tenance—imparting a most surprising cheer-  
fulness to the mind—a vigor and elasticity  
of thought unknown before. The debilitated  
and those suffering from want of vital energy
