IMAGINARY EVILS.

Let to-morrow take care of to-morrow
Leave things of the future to fate;
What's the use to anticipate sorrow
Life's troubles come never too late!
If to hope overmuch be an error,
'Tis one that the wise have preferred:
And how often have hearts been in terror
Of evils that never occurred.

Have faith, and thy faith shall sustain thee;
Permit not vain fear and care
With invisible bonds to enchain thee,
But bear what God gives thee to bear.
By His spirit supported and gladdened,
Be ne'er by forebodings deterred:
But think how oft hearts have been saddened
By fear of what never occurred.

Let to-morrow take care of to-morrow
Short and dark as our life may appear,
We may make it still darker by sorrow
Still shorter by folly and fear!
Half our troubles are half our invention,
And often from blessings conferred
Have we shrunk, in the wild apprehension
Of evils that never occurred.

FEED FOR HORSES.

BY E. W. STEWART.

The expense of feeding work horses, whether on the farm or in the city, is so great that its economy should be thoroughly studied. As the horse is kept for his muscle, he must have food to supply muscle. But it is found, also, that great muscular exertion requires more rapid respiration, and this respiration is sustained by the carbon of the food; therefore there must be a proper balance between the carbonaceous and nitrogenous elements of the food. Corn meal contains ten per cent. of muscle-sustaining food, and sixty-eight per cent. of heat or fat producing food. This contains too much carbon and too little nitrogen as a principal food for horses. It is too heating and fattening, and deficient in muscular force. Let us examine a few of the foods sometimes given to horses.

Of nitrogenous or muscle forming food, the oat contains 15 per cent; the pea 24: oil meal, 26; wheat and rye bran, 16, barley, 9; rye flour 10; millet, 14; timothy hay 10; red clover, 16 per cent. Of carbonaceous or heat and fat producing food, the oat contains 60 per cent; the pea 51; oil meal, 42; wheat and rye bran, 55; barley, 65, rye flour, 72; millet, 62; timothy hay, 47; red clover, 40 per cent. It will be seen that of the grains given above, the oat contains four of heat and fat producing food, to one of muscle forming matter, and this, for great muscular exertion, is found to be the best proportion.

The fast horse men have long since decided in favor of oats, combined sometimes, with wheat bran, which has about the same proportion. It will also be observed that clover hay is very rich in muscle forming food; but there is a limit to the digestion of such bulky food, and therefore only a certain amount can be given to a horse under hard labor.

We, many years ago, adopted and practically carried out, a formula for feeding horses subject to hard labor, as follows:—One pound of oil meal, three pounds of pea meal, four pounds of wheat bran, four pounds of corn meal, twelve pounds of hay to each horse per day. This, in most of our inland cities at this time, will cost only 30 cents per day. Our horses weighed about 1,050 pounds each, and on this diet could perform very hard labor and keep in fine condition. If the ingredients of this diet be examined, it will be found that they contain all requisites for supplying every want of the system.

We have also used another formula for a labor diet., viz.:—One pound of oil meal, eight pounds of oat meal, four pounds of corn meal, and twelve pounds of hay. This did very well, but was not quite equal to the first, although, generally, it will cost a little more.

For a diet without much labor, we have found the following very good:—One-half pound of oil meal, eight pounds of wheat bran, and sixteen pounds of hay. This, at present, would cost about twenty cents per day.

It is proper to state that the hay was cut and moistened, then the other ingredients mixed with it, usually at night, and left to the next day for feeding, causing incipient fermentation. We thought this an advantage, softening the fiber and rendering mastication easier; but afterwards, we steamed the whole together and found that a great improvement. A little oil meal, each day, to above, assists digestion, keeps his coat smooth, and is well worth its cost as a food.

We must not omit to note a very common error in feeding horses, which has cost the life of many a noble animal—feeding corn meal, or other concentrated food alone. Corn meal, eaten alone, goes into the stomach of the horse in the solid state of a housewife's dough. To digest this mass the gastric juice must penetrate and circulate through it. But, as this cannot be done, the digesting fluid operates only on the surface of the dough. The consequence is, that before it can be digested, fever of the stomach is produced, and sometimes death. But when the meal is mixed with cut hay and moistened so the meal adheres to it, the hay separates the particles of meal so the gastric juice circulates through it like a sponge. Corn meal is quite harmless, even for colts, when thus fed.

We have found the formulas of diet for horses, given above, the cheapest and best, on a trial of years; but it will be seen that from the materials mentioned, a great variety of diets may be formed with the requisite constituents for health and strength. Oats from the general preference given to them are usually dearer, according to their real value, than some other forms of food containing the same constituents, and when this is the case others should be substituted.

THE SHORTEST CUT TO THE GRAVE is taken by thousands who, with common prudence might live to a green old age. Why will people neglect a cold? The great Abernethy pronounced a fixed cough only one degree less dangerous than the plague. Yet it is as certainly controlable, as readily extinguished by the use of Hale's Honey of Horehound and Tar, as fire is by the play of Croton. Delay not an hour in applying the remedy. It requires but a short time for the lungs to congest; for the tubercals to form; for death to ensue. The great specific is obtainable of all druggists at 50 cents and $1. Great saving by buying large size.

DYSPEPSIA IS A HYDRA-HEADED MONSTER from which nearly all "the ills the human flesh is heir to" originate. The Peruvian Syrup, a protected solution of the protoxide of Iron, is a long-tried and well established remedy for this distressing complaint: it has cured thousands when other remedies have failed.

GLASS LAMPS BREAK & EXPLODE,
CAUSING
FIRE AND DEATH.
CANVASSERS WANTED!
Good Canvasers can make money and do good selling the.
PERKINS & HOUSE PATENT
Non-Explosive Kerosene Lamp.
IT CAN NOT BE EXPLODED
By anything Short of
Nitro Glycirene Or Gunpowder.
We claim for this remarkable Lamp
1st. Absolute Safety under all Circumstances.
2d. It gives twice as much light from same sized wick.
3d. It uses 33 per cent. less oil.
4th. It is ornamental and durable—Lasts a Life-time.
5th. It gives no odor in burning—turned never so low.
6th. The steadiness of flame is especially wonderful.
7th. It is a successful rival of gas at a trifling expense.
OPINIONS IN BRIEF OF EMINENT MEN.
Prof. W. S. Clark, President of Mass. Agri. College says: "It is non-explosive. The light is better than is produced by any other lamp. I believe it is true economy in view of the safety, the quality and quantity of light, and the durability of this lamp, to throw away all other kinds and use this only."
C. T. Jackson, M. D., of Boston, State Assayer, Says: "I find it free from all danger of explosion, when exposed to the severest tests. Its general introduction, in place of the unsafe glass lamps, will save much property from fire and prevent those fearful explosions, which have so often proved fatal to life.
The New York Tribune says: "No other is perfectly safe. All the points of danger have been so carefully guarded that disaster is simply an impossibility.
The New York Independent says: Nothing more need be said to bring this lamp at once into public confidence and Universal use.

THE
FIRST MORTGAGE BONDS
OF THE
Chicago, Danville and
VINCENNES RAILROAD.

Total amount to be issued,	$2 500 000
Capital Stock paid in,	2 100 000
Estimated Cost of Road (140 m.)	1 500 000
Estimated Earnings per annum,	2 639 306
Net Earnings per annum,	879 768
Interest on the Loan per annum,	175 000
Amount of Bonds per mile of Road,	18 000
Amount of interest per mile,	1 260
Amount of Net Earnings per mile,	6 283

The Bonds follow the completion of the Road—have the Union Trust Company of N. Y. as their Official Register and Transfer Agent—and are sold at present at 95 and accrued interest.
They bear examination and comparison, better, it is believed, than any other now before the public, in the fixed and unchangeable elements *Safety, Security, and Profit.*
They bear good interest—Seven per cent. Gold for forty years—and are secured by a *Sinking Fund*, and First Mortgage upon the road, its outfit, and net in come, the Franchises, and all present and future acquired property of the Company.
They depend upon no new or half-settled territory for business to pay their interest, but upon an old well settled, and productive country;—assuming that a railroad built through the heart of such a region offers better security for both *Interest and Principal* than a road *to be built* through the most highly extolled wilderness or sparsely settled territory.
This Railroad possesses special advantages, in running into and out of the City of Chicago, an important Railroad and Commercial Center; in running through a line of villages and old farming settlements in the richest portion of the State of Illinois; in running near to deposits of Iron Ore of great extent and value, and over broad fields of the best coal in the State—which mining interests are its monopoly. And besides the local and other business thus assured, there will be attracted to this road the considerable traffic already springing up "From the Lakes to the Gulf," as with its Southern connections it forms a Trunk Line 45 miles shorter than any other route from Chicago to Nashville.
These Bonds are therefore based upon a Reality and a Business that a few years must inevitably double—and competent judges say treble—in value.
Governments selling while the price is high pay well if put into these Bonds, and Trust or Estate Funds can be put into NOTHING BETTER.
Phamplets, with Maps, &c., on hand for distribution.
Bonds may be had directly of us, or of our Agent in Watertown, THE MERCHANTS BANK.

Ayer's Cathartic Pills,
For all the purposes of a Laxative Medicine.

Perhaps no one medicine is so universally required by everybody as a cathartic, nor was ever any before so universally adopted into use, in every country and among all classes, as this mild but efficient purgative Pill. The obvious reason is, that it is a more reliable and far more effectual remedy than any other. Those who have tried it, know that it cured them; those who have not, know that it cures their neighbors and friends, and all know that what it does once it does always—that it never fails through any fault or neglect of its composition. We have thousands upon thousands of certificates of their remarkable cures of the following complaints, but such cures are known in every neighborhood, and we need not publish them. Adapted to all ages and conditions in all climates; containing neither calomel or any deleterious drug, they may be taken with safety by anybody. Their sugar coating preserves them ever fresh and makes them pleasant to take, while being purely vegetable no harm can arise from their use in any quantity.
They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.
Minute directions are given in the wrapper on the box, for the following complaints, which these *Pills* rapidly cure:—
For **Dyspepsia**, or **Indigestion, Listlessness, Languor**, and **Loss of Appetite**, they should be taken moderately to stimulate the stomach and restore its healthy tone and action.
For **Liver Complaint** and its various symptoms, **Bilious Headache, Sick Headache, Jaundice** or **Green Sickness, Bilious Colic** and **Bilious Fevers**, they should be judiciously taken for each case, to correct the diseased action or remove the obstructions which cause it.
For **Dysentery** or **Diarrhœa**, but one mild dose is generally required.
For **Rheumatism, Gout, Gravel, Palpitation of the Heart, Pain in the Side, Back and Loins**, they should be continuously taken, as required, to change the diseased action of the system. With such change those complaints disappear.
For **Dropsy** and **Dropsical Swellings** they should be taken in large and frequent doses to produce the effect of a drastic purge.
For **Suppression** a large dose should be taken as it produces the desired effect by sympathy.
As a *Dinner Pill*, take one or two *Pills* to promote digestion and relieve the stomach.
An occasional dose stimulates the stomach and bowels into healthy action, restores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these *Pills* makes him feel decidedly better, from their cleansing and renovating effect on the digestive apparatus.

CRANE'S BALSAM.
The Elixir of Strength.
A sure and speedy cure for all Diseases of the Kidneys, Inflamation or Irritation of the Bladder, Non-retention or Incontinence of Urine, Gravel, Brick Dust Deposit, Mucous Discharges, Stone in the Bladder, Lower Back.
And all Diseases of the Urinary Organs, In either Male or Female, from whatever cause originating, and however long standing.
This preparation is purely Vegetable containing no MINERAL and acts specially on the Kidneys and Urinary Passages. It invigorates the constitution, counteracts Nervous Irritation, and imparts tone and vitality to the whole system.
For Diseases of the Kidneys, or any derangement of the KIDNEYS, it is invaluable.
For Leucorrhœa or Whites, it has been remarkably successful in many cases of long standing, and has never been known to fail when the directions have been strictly complied with.
We deem it hardly necessary to publish the many unsolicited certificates, as we feel confident that when it is tried, it will recommend itself. Beware of all other preparations for this disease. For sale by all Druggists. Manufactured by E. LEWIS & Co., Watertown, N. Y.
