WARNER'S VIENNA SYRUP, for sale by THEO. A. FROST, Druggist.

Watertown Daily Times.

Planting Himself to Grow.

Dear little bright-eyed Willie,
Always so full of glee,
Always so very mischievous,
The pride of our home is he.

One bright summer day we found him
Close by the garden wall,
Standing so grave and dignified
Beside a sunflower tall.

His tiny feet he had covered
With the moist and cooling sand;
The stalk of the great, tall sunflower
He grasped with his chubby hand.

When he saw us standing near him
Gazing so wonderingly
At his babyship, he greeted us
With a merry shout of glee.

We asked our darling what pleased him:
He replied, with a face aglow,
"Mamma, I'm going to be a man;
"I've planted myself to grow."

—Texas has a town named Sand Fly.

—Peach trees are in bloom in Georgia.

—Charles Dickens is going to read in Paris.

—Saratoga has developed a new mineral spring.

—Dumas, Senior, owes 200,000 francs to Dumas, Junior.

—New York is now sending oysters by every steamer to England.

—Traupmann's photograph was sold to the number of 200,000 in Paris.

—Four hundred new postoffices will be opened in the United States, July 1.

—Silas C. Herring is among the lions of Paris; but he is a sale man anywhere.

—Patti has received from Alexander of Russia the Order of Merit, and merited the order.

—Venison in Missouri is quoted at four cents a pound, which certainly is not dear meat.

—Isaac Walton was one of those gentleman of the old school who did not spare the rod.

—Napoleon goes hunting every Saturday now, and boldly takes the field in an old postchaise.

—The next patient issue from the office at Washington will number one hundred thousand.

—The man who always fired up on the slightest provocation was usually and speedily put out.

—Paul Gustave Dore talks of coming to this country in May and returning to Paris in autumn.

—Since the earthquakes, San Francisco contests with Philadelphia the claim to the title of Quaker City.

—Central Park policeman keep a close eye on the boys till the ponds freeze, and then they let 'im slide.

—For his attention to the Prince and for more distinguished services Mr Thornton is to receive a baronetcy.

—Pierre Bonaparte is still on desperate deeds intent; in the event of his acquittal, he threatens to visit New York.

—German papers say that emigration to the United States next summer will be larger than in any former season.

Writing by Sound.

THE time may come, though it may seem premature to expect it, when a man's words will be made to write themselves down automatically as fast as they come from his lips – when a speech will yield a sound picture, or a sonogram, that we may gaze upon as we now do upon a light picture, and translate as we do the notes of a piece of music. Nonsense, you say? It is no nonsense, no dream. Go ask a physicist if he can conceive its possibility, and, unless he be a very narrow-sighted member of his community, he will reply that he can. You who now say "nonsense" would have said the same fifty years ago, if any one had told you that some day the image of your countenance would paint itself photographically. But before you repeat your derision, think of this: Light is a wave-motion and the chemist has found a substance which the waves, as they dash against it, can transform or transmute; and so we have got photography. Sound is a wave-motion; its waves are as breakers, light's are as ripples; the former large and slow, the latter small and rapid. Now, since we have got the substance that is impressible by the little weak waves, why should we despair of finding a substance that will alter under the influence of the great, strong ones? We can make a lamp glass ring with the voice pitched to a certain note; soon we may cause the same sound to vibrate a body that will make a mark on paper as it swings, and then we can make another working body vibrate to another sound, and so on up the gamut. Thus we shall get an apparatus which will mark the notes of a melody, each as it is sung; and after this it is not difficult to conceive a series of vibrators each attuned to one of the few seprate and distinct sounds that the human voice can utter. Here will be an analogue to the photographer's camera: placed before a speaker, such as apparatus will sonograph all he has to say. Some who smile at this will live to see the thing done.

NEW IN DENTISTRY.—

1st—The pure of Dr. Twitchell, which secures to the wearer the three following advantages over all other rubber plates:

2d—Easy and perfect mastication by means of a soft, rubber lining over metallic surface in contact with the gums.

3d—A perfect section, without ridges or edges to cut, irritate the lips, tongue or lacerate and irritate the jaw and make up for defects in the fit of the plate.

3d—There is no preparation of mercury in said lining as in other rubber, hence the irritation bordering on salivation, seen in so many sensitive mouths wearing the ordinary plates, is entirely prevented.

The following certificate, among others of the same import, speaks for itself, after a trial of two years and a half:

In the summer and fall of 1866, I had the typhoid fever for six weeks. During that time I was salivated three times and lost a portion of my teeth. To obviate this loss I had recourse to the dental art, trying some of the best dentists of most distinguished skill and ability of whom I could learn in the State of New York. But, with their best efforts and skill, I suffered constantly from irritation of the gums, caused by the plates—from its dislodgement by talking and the introduction of food between the plate and the gums. I have tried every invention and device that promised benefit, but with indifferent success. I have had two or three plates with the flexible rubber air chamber. I have had two of Folsom's patent, but I have found none that bear any comparison in weariness, irritation and annoyance, and in firmness of adhesion to the palate of Dr. Twitchell. I consider it, for the most perfect invention in the dental art that I have ever tried, and complete in all those points alluded to in the foregoing certificate.

JAMES DOUGLAS, Pastor Congregational Church, Pulaski, N. Y. Late of Rutland, N. Y.

The undersigned have purchased the exclusive right for the county of Jefferson. We guarantee to our patrons a more perfect, easier, and better fitting plate than can be made by any other method, and as we do our own work we speak with confidence. Prices the same as dentists charge for their old style of work.

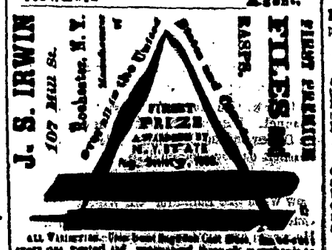
J. S. IRWIN, 107 Mill St. Rochester, N. Y.



all Watertight. Your Boat Supplied Cost Price. I have sold every one tested and warranted through it continues to customers. He makes more in the year to buy a boat. MACHINERY, Mill Owners, or others buying by the gross or dozen, supplied at wholesale rates. Address I save you about one-half in transmitting money and time and rears, by printing the old, with my improved machinery, using my superior tempered Saleratus Plates, never and which now. Consumers, and your Retailers, buy Superior Saleratus Plates; you will get good ones at present.

THE FIRST MORTGAGE BONDS OF THE Chicago, Danville and VINCENNES RAILROAD.

Total amount to be issued,	$2 500 000
Capital stock paid in,	2 100 000
Estimated Cost of Road (140m.)	4 500 000
Estimated Earnings per annum,	2 639 306
Net Earnings per annum,	879 768
Interest on the Loan per annum,	175 000
Amount of Bonds per mile of Road,	18 000
Amount of interest per mile,	1 260
Amount of Net Earnings per mile,	6 283

The Bonds follow the completion of the Road—have the Union Trust Company of N. Y. as their Official Register and Transfer Agent—and are sold at present at 95 and accrued interest.

They bear examination and comparison, better, it is believed, than any other now before the public, in the first and unchangeable elements of safety, Security, and Profit.

They bear good interest—Seven per cent. Gold for forty years—and are secured by a Sinking Fund, and First Mortgage upon the road, its outfit, and net income, the Franchises, and all present and future acquired property of the Company.

They depend upon no new or half-settled territory for business to pay their interest, but upon an old well settled, and productive country;—assuming that a railroad built through the heart of such a region offers better security for both Interest and Principal than a road to be built through the most highly extolled wilderness or sparsely settled territory.

This Railroad possesses special advantages, in running in to and out of the City of Chicago, an important Railroad and Commercial Center; in running through a line of villages and oldest farming settlements in the richest portion of the State of Illinois; in running near to deposits of Iron Ore of great extent and value, and over broad levels of the best coal in the State—which mining interests are its monopoly. And besides the local and other business thus assured, there will be attracted to this road the considerable traffic already springing up "From the Lakes to the Gulf;" as with its Southern Connections it forms a Trunk Line 45 miles shorter than any other route from Chicago to Nashville.

These Bonds are therefore based upon an Reality and a Business that a few years must inevitably double—and competent judges say treble—in value.

Governments selling while the price is high pay well if put into Those Bonds, and Trust or Estate Funds can be put into NOTHING BETTER.

Pamphlets, with Maps, &c., on hand for distribution.

Bonds may be had directly of us, or of our Agent in Watertown, THE MERCHANTS BANK.

W. BAILEY LANG & CO., 54 CLIFF STREET, NEW YORK, Agents for the sale of the Bonds jan. 1—6. dtm

ESTABLISHED 1837.

P. MUNDY & SON. Wholesale & Retail Grocers DEALERS IN Provisions, Wines & Liquors,

No. 3, Iron Block, Watertown,

Are now receiving in store a very large and extensive stock of Goods in their line of trade—which they offer for sale on SHORT TIME or STRICTLY CASH at

Low Prices.

The long credit system was reconstructed when the Junior Partner was admitted, and the SHORT TIME and READY CASH plan inaugurated.

To The Wholesale Buyer,

We say come and examine goods and prices, and we will try and do you good. Our $1 per cent among the Tea Chests, enables us to select the BEST TEAS for the Least Money. This experience also applies to other goods in our line, and we will share with you the benefit.

TO THE RETAIL TRADE,

We can say, our stock was never more complete, embracing DELICACIES and SUBSTANTIALS from all parts of the world, and will be sold as cheap as in any market where

Pure Goods

And Full Weights and Measures are Given.

We have an unusually large stock of SUGAR of the various grades, purchased at a most favorable time, which we propose to retail at Cash, to prevent the premised threatened Frost-Grow.

In Teas we do not intend to be undersold by any party of Tea Company, and never offer any that is not sweet and good drawing.

Green & Japan $1 & upwards,

We invite comparison.

Our Wine Room, is always well stocked with Fine Pure Wines and Liquors, of foreign and Native production, including Champagnes, Scotch Ales, Alegar &c., Brics &c. London Porter, Brown Stout, Cordials, California Wine, Bitters, &c., suited for Hotels, Medicinal or Social purposes.

The Pork Packing Warehouse, is well supplied with Pork, Hams, Shoulders, Lard and Dried Beef—all of our own curing—and will be sold as low as the market will warrant.

☞ Old and New Customers, are respectfully invited to call. June 2. 1869. dtf

First Class Pianos, Organs, Melodeons, Sheet Music

Violin Strings, &c. which we keep in full supply, at Wholesale and Retail.

Every person wanting a Sewing Machine,

Should examine the Wheeler & Wilson before purchasing, as it has proved itself to be the

Best Machine in the World.

LET THE PEOPLE ANSWER.

Over 430,000 already in use. 70,000 made in 1869.

READ THE FOLLOWING:

In the testimony before the Commissioners of Patents, the witnesses (well qualified, from observation and experience) directly and emphatically testified to the simplicity of the Wheeler & Wilson Machine, and its consequent freedom from wear and need of repairs.

The only Gold Medal for the manufacture and production of Sewing Machines and Fixtures, both of which was awarded to Messrs. Wheeler & Wilson, of New York.

HENRY T. BLOW, Member and Reporter of the International Jury.

Messrs. Wheeler & Wilson, the Broadway, N. Y., received the GOLD MEDAL, and were GRANT Cross awarded for the most perfect Sewing Machine, and Button-hole Machines exhibited in the Paris Universal Exposition.

J. T. DUNN, U. S. General Agent for the Exposition.

THE BUTTON HOLE ATTACHMENT

The mechanism is a plain, positive movement, by an extra cloth-plate of its own, which, by its interchange with the ordinary cloth-plate, forms the bottom hole, formed at each end, in the finished buttonhole, and rapidly made, at the rate of one hundred buttonholes an hour. It is adapted to family use, and manufacture, in the same kind of work and material. Beautiful forms, varied to suit the taste of manufacturers, will find it especially useful. The whole machine, while making this button-hole, is under the easy purposes of sewing, and is as simple, durable, and self-oiling and sewing as any machine in the market. The qualities found in no other machine for this purpose. There are other attachments for special purposes.

THE SHUTTLE SEWING MACHINE.

I made one hundred pairs of pantaloons for myself and friend, with one needle and one thread machine, and made three hundred pairs in nine months. I say the truth.

Troy, Rensselaer Co., N. Y. PERRY & WATKINS.
