Watertown Daily Times.

How about Elijah!

An Illinois Lady Lives Twenty Years without Seeing a Minister.

From Onward.

A Methodist minister was on his travels through the west of Illinois twenty years ago. Illinois was a wild place then. He traveled twenty miles one day without coming to a farm house. But there he was received with hospitality. Chicken pot pie and corn dodgers composed his supper; but to a hungry man these are as good as a truffled turkey.

A fine old grandmother of the house was most profuse in her hospitality. She pressed the pot pie on the holy man's plate till he could eat no more. And then, when the family was gathered around the great log-chimney and its blazing fire, the venerable dame opened her mouth, and thus spake:

"Ah, well-a-day! it's a grand comfort to have a minister of the Gospel in these parts. It's twenty years agone now since I have seen one on 'em. I've been a readin' o' my Bible all that time, an' waitin' to see a minister to ax him a question about suthin' I don't rightly understand."

"Madam," answered the cautious minister, "I am so tired with my long ride that I could not enter into a serious question until I have slept; but if you will ask me to morrow morning before I set out, I will answer it to the best of my ability."

The old lady expressed herself satisfied, and the cunning minister secured a soft couch for the night. The next morning grandma was up early, and hard at work, frying slapjacks for the minister's breakfast. This last being despatched, the old lady was still in a nervous fidget about her question, while the holy man's horse was saddled and brought to the door.

After adjusting his saddle-bags and shaking hands with all the family, he mounted his horse, and, turning to her, asked:

"And now, Madam, what is your question?"

"Waal minister," said she, "yer know how it ses in the Bible, that arter Elisha was made a prophet, the heaven's opened and Elijah was taken up to heaven in a chariot and horses o' fire. It's better nor twenty years sin' I seed that ere in the Bible, and I have puzzled over it ever since; an there ain't a soul roun' these diggins knows any more nor I. But you're a minister o' the Gospel, an' ought to know all them things. Now what I want to know is this: Did the Lord take up Elijah right slick to heaven, or didn't he go kinder slantendicular?"

Years and Leap Years.

The year 1900 will not be a leap year. 1896 and 1904 will be leap years. To explain this we must give a short account of the change of style in the calendar effected by Pope Gregory XIII. He found the error of eleven minutes in the Julian calendar had amounted to ten days. He therefore deducted ten days in October, 1582, and to prevent a recurrence of the error it was ordered that every year ending a century should not be a leap year, except the multiples of the year 400. Thus, 1600 was a leap year, but 1700 was not, nor 1800, nor will 1900 be; but 2000 will be leap year, and every 400th year after it. In England and America the Gregorian calendar was not adopted until 1753; consequently with us 1700 was not a leap year and we were eleven days out. These were subtracted, and at the time the measure enacting the alteration caused considerable uneasiness, and some few riots among the poorer people who could not comprehend the matter, and raised the cry of "give us back our eleven days!" The Greeks and Russians still retain the old style; so that there is now a difference of twelve days between their date and ours, because they considered 1700 and 100 as leap years.

The term "bissextile," as applied to the leap year, was given by Julius Cæsar, when he reformed the calendar. He gave additional days every four years to February, as being the shortest month, and caused it to be inserted between the 24th and 25th. By the Roman mode of reckoning the 23d of February was called the sixth before the calendar of March, and the intercalary day was therefore named "bis sextus dies," the second sixth day, and the year "bissextile," contained the second sixth day.

Josh Billings on Courtin.

Courtin,' like sailin', is delightful bisness, where yu hev an open see, the wind in yur favor, and you are boulin along toward the port ov matrimony 7ty-five nots an hour.

In courtin', however, there is sometimes wunser storms to wether than even the sailor ever drampt ov hed winds and heavy seas in the shape of stern parints; hidden rocks and reefs in the form of other lovers, with sum chance ov bein' driv into a lee shore by the gal herself.

Yet under ordinary circumstances, a lover will in due kourse of time "fetch port," if he iz kontinually on guard against dangers, with wun eie to the starboard and the other on his kompass.

A grate many luvers begin wrong; they think that if they wunce get pinted for the gurl's hart, it is enuff; so they hist up anker crowd on sale, and the fust they kno, they are in to the brakers, or way out to see under jury masts, with the konsolin reflecshun that the cruise is up.

If the gurl is an orphan an willin, or if she iz of age with twenty 5 thousand in her own rite, it iz safe komparatively, to run alongside and grapie her at wunce.

But unless you have made up your mind to sepport yourself, partly at least, never undertake this mode of attack onto less than the above sum.

I hav cum to the konklushun, after 7ty-nine years ov careful study, that it is better to run away with a twenth-five thousand gal than to try to live on luv and a stern parint's kusses exklusively.

To be successful in courtin', then the luver must learn to navigate his bark into the parint's favor just as much az into the girl's; and let me tell yu, sighin' yuth yu her got to "cram up" on navigation to do this.

After a luver wunce gits over these obstructions into smooth water and fair winds he can sail into matrid life like a streak of lightnin down a chestnut tree!

Don't oh, mellow yuth, fall in luv with the paint and the git on the outside ov yur prize, but learn whether she is sea-worthy, and if she is, get out yur papers, get the bill of lades, and launch out into life, a happy couple.

Nov20w L. R. MURRAY & Co.

NEW IN DENTISTRY!—

The patent of Dr. Twitchell, which secures to the wearer the three following advantages over all other rubber plates:

1st—Ease and comfort by means of a soft, rubber lining over the entire surface in contact with the jaw and gums.

2d—A perfect suction, without ridges or edges formed, into the living tissue to irritate and irritate the jaw and make up for defects in the fit of the plate.

3d—There is no preparation of mercury in said lining as in other rubber, hence the irritation bordering on salivation, seen in so many sensitive mouths wearing the ordinary plates, is entirely prevented.

The following certificate, among others of the same import, speaks for itself, after a trial of two years and a half:

In the summer and fall of 1863, I had the typhoid fever for six weeks. During that time I was salivated three times and lost some of my teeth. To obviate this loss I had recourse to the dental art, trying some of the best dentists of most distinguished skill and fidelity of whom I could learn in the State of New York. But, with their best efforts and skill, I suffered constantly from irritation of the gums, caused by the plate—from its falling—from its displacement by tissue, and the introduction of food between the plate and the gums. I have tried every invention and device that promised benefit, but with indifferent success. I have had two or three plates with the flexible rubber air chamber. I have had two of Folsom's patent, but I have found none that bear my comprition in wearing, in freedom from irritation and annoyance, and in firmness of adhesion to the patent of Dr. Twitchell. I consider it, far the most perfect invention in the dental art that I have ever tried, and complete in all those points alluded to in the foregoing circular.

JAMES DOUGLAS.
Pastor Congregational Church, Pulaski, N. Y.
Late of Holland, N. Y.

The undersigned have purchased the exclusive right for the county of Jefferson. We guarantee to our patrons a more perfect, easier, and better fitting plate than can be made by any other method, and as we do our own work we speak with confidence. Prices the same as dentists charge for their old style of work.

THE GREAT PRIZE

IS AWARDED IN EVERY CASE WHERE THE QUALITIES OF THE ELIAS HOWE SEWING MACHINE & SILK ARE FULLY TESTED

ELIAS HOWE JR. INVENTOR & MAKER NEW YORK U.S.A.

At the World's Fair of 1867!

THE NEW AND IMPROVED

Elias Howe Sewing Machine

WAS awarded the First Prize at the Paris Exposition of 1867, over 33 other Machines. Also the following State Fairs of 1868 have awarded this Machine the First Premium:—New York, Massachusetts, Vermont, Ohio, Pennsylvania, Indiana, New Hampshire, Wisconsin;—and at the County Fairs of Madison, Onondaga, Oswego, Wayne, Monroe, Herkimer, Schuyler, Livingston, and many others.

They are adapted to all kinds of Family Sewing and to the use of Seamstresses, Dress Makers, Tailors, Manufacturers of Shirts, Collars, Skirts, Cloaks Mantillas, Clothing, Hats, Caps, Corsets, Boots, Shoes, Harness, Saddles, Linen Goods, Umbrellas, Parasols, etc. They work equally well upon silk, linen, woolen and cotton goods with silk, cotton or linen thread. They will seam, quilt, gather, hem, fell, cord braid, bind and embroider every species of sewing, making a beautiful and perfect stitch, alike on both sides of the articles sewed.

A simple lesson in this Machine that any one purchasing it can be taught to work it in a few minutes. It will work with any kind of Thread, from the finest to the coarsest, and is adapted for all kinds of Sewing from that of the Harness or Boot and Shoe Maker to the finest Family Sewing.

Each Machine will be furnished complete with Hemmer, Feller, Braider, Quilter, Needles, Oil, &c.

The best of references can be furnished to any one who desire them from scores of Ladies in this vicinity who are using the Howe Machine.

Don't fail to call and examine these Machines and the work done by them.

Price from $60 to $200, and every Machine warranted. Machine twist and thread kept on hand.

THE

FIRST MORTGAGE BONDS

OF THE

Chicago, Danville and VINCENNES RAILROAD.

Total amount to be issued,	$2 500 000
Capital Stock paid in,	2 100 000
Estimated Cost of Road (140 m.)	4 500 000
Estimated Earnings per annum,	2 639 306
Net Earnings per annum,	879 768
Interest on the Loan per annum,	175 000
Amount of Bonds per mile of Road,	18 000
Amount of interest per mile,	1 260
Amount of Net Earnings per mile,	6 283

The Bonds follow the completion of the Road—have the Union Trust Company of N. Y. as their Official Register and Transfer Agent—and are sold at present at 95 and accrued interest.

They bear examination and comparison, better, it is believed, than any other now before the public, in the fixed and unchangeable elements *Safety, Security, and Profit.*

They bear good interest—Seven per cent. Gold for forty years—and are secured by a *Sinking Fund*, and First Mortgage upon the road, its outfit, and net in come, the Franchises, and all present and future acquired property of the Company.

They depend upon no new or half-settled territory for business to pay their interest, but upon an old well settled, and productive country;—assuming that a railroad built through the heart of such a region offers better security for both *Interest and Principal* than a road *to be built* through the most highly extolled wilderness or sparsely settled territory.

This Railroad possesses special advantages, in running into and out of the City of Chicago, an important Railroad and Commercial Center; in running through a line of villages and old farming settlements in the richest portion of the State of Illinois; in running near to deposits of Iron Ore of great extent and value, and over broad fields of the best coal in the State—which mining interests are its monopoly. And besides the local and other business thus assured, there will be attracted to this road the considerable traffic already springing up "From the lakes to the Gulf," as with its Southern Connections it forms a Trunk Line 45 miles shorter than any other route from Chicago to Nashville.

These Bonds are therefore based upon a Reality and a Business that a few years must inevitably double—and competent judges say treble—in value.

Governments selling while the price is high pay well if put into these Bonds, and Trust or Estate Funds can be put into NOTHING BETTER.

Pamphlets, with Maps, &c., on hand for distribution.

Bonds may be had directly of us, or of our Agent in Watertown, THE MERCHANTS BANK.

Violin Strings, &c. which we keep in store, at Wholesale and Retail.

Every person wanting a Sewing Machine, should examine the Wheeler & Wilson ere purchasing, as it has proved itself to be of the

Best Machine in the World.

LET THE PEOPLE ANSWER.

Over 480,000 already in use—Over 80,000 made in 1869.

READ THE FOLLOWING:

In the testimony before the Commissioner of Patents the witnesses (well qualified from observation and experience) directed his especial attention to the simplicity of the Wheeler & Wilson Machine, and the consequent freedom from wear and need of repairs.

The only Gold Medal for the manufacture and perfection of Sewing Machines and Button hole Machines was awarded to Messrs. Wheeler & Wilson, of New York.

HENRY F. Q. D'ALBERT,
Member and Reporter of the International Jury.

Messrs. Wheeler & Wilson, 625 Broadway, N. Y., received the Gold MEDAL, and THE ONLY ONE, awarded for the most perfect Sewing Machine and Button-hole Machine exhibited at the Paris Universal Exposition.

J. C. DIXEY,
U. S. General Agent for the Exposition.

THE BUTTON HOLE ATTACHMENT

The mechanism is a simple device attached to an extra cloth-plate of the machine, which is readily interchanged with the ordinary cloth plate. The button-hole, barred at each end, is most substantially, beauty, and rapidity made, at the rate of one hundred holes an hour. It is adapted to family work and manufactures in the sewing of purpose and material. Seamstresses, dress-makers and shirt-manufacturers, will find it especially useful. Thus the machine, while retaining the lock-stitch for the ordinary purposes of sewing, combines therein the embroidering and making button-holes—a union of qualities found in no other machine in the world. There are other attachments for special purposes.

THE MOST DURABLE MACHINE

I made one hundred pairs of pantaloons, all thick and lined, with *one needle* without changing it: also made three hundred pairs in nine months.

Very truly yours,
Mrs. A. M. TAYLOR.

Troy, Bradford Co. Pa.

THE MUSCATINE GRAPE.

This is the earliest, hardiest and most valuable grape in existence for Northern New York, and is now established fact, that in a few years it will be grown between the Atlantic and Mississippi, where there is not been grown and fruited. It is acknowledged to be the best grape for making wine, and is the only grape of first quality that will ripen well and fully mature its fruit in our cold climate. Price from $1 to $2. Send stamp for circular.

Other early Grapes, such as Concord, Rogers' No. 4, Diana, Delaware, Hartford Prolific, Iona, Israella, Clinton, Isabella, Catawba, Norton's Virginia, Herbemont, Taylor, Ives' Seedling, Creveling, Allen's Hybrid, Rebecca, Martha, Adirondac, Union Village, Anna, Diana Hybrid, Lady, Dracut Amber, Black Hamburg, Golden Chasselas, Black Prince, White Muscat of Alexandria, Black Muscat of Alexandria, Black Frontignan, Purple Damascus, Red Chasselas, Grizzly Frontignan, White Frontignan, Red Frontignan, Golden Hamburg, Golden Champion, White Malvoisie, Red Malvoisie, Black Malvoisie, Flowering Raisin, Black Cluster, Red Cluster, White Cluster, Black Tokay, Red Tokay, White Tokay, Purple Constantia, White Constantia, Red Constantia, Black Constantia, Black Portugal, Red Portugal, White Portugal, Black Lisbon, Red Lisbon, White Lisbon, Black Morocco, Red Morocco, White Morocco, Black Barbarossa, Red Barbarossa, White Barbarossa, Black Damascus, Red Damascus, White Damascus, Black Alexandria, Red Alexandria, White Alexandria, Black Muscadine, Red Muscadine, White Muscadine, Black Muscat, Red Muscat, White Muscat, Black Hamburg, Red Hamburg, White Hamburg, Black Frontignan, Red Frontignan, White Frontignan, Black Chasselas, Red Chasselas, White Chasselas, Black Prince, Red Prince, White Prince, Black Cluster, Red Cluster, White Cluster, Black Tokay, Red Tokay, White Tokay, Purple Constantia, White Constantia, Red Constantia, Black Constantia, Black Portugal, Red Portugal, White Portugal, Black Lisbon, Red Lisbon, White Lisbon, Black Morocco, Red Morocco, White Morocco, Black Barbarossa, Red Barbarossa, White Barbarossa, Black Damascus, Red Damascus, White Damascus, Black Alexandria, Red Alexandria, White Alexandria, Black Muscadine, Red Muscadine, White Muscadine, Black Muscat, Red Muscat, White Muscat.
