# A PERFECT BAKING POWDER

The great success of the Royal Baking Powder is due to the extreme care exercised by the manufacturers to make it entirely pure, uniform in quality, and of the highest leavening power. All the scientific knowledge, care, and skill attained by a twenty years' practical experience are con tributed toward this end, and no pharmaceutical preparation can be dispensed with a greater accuracy, precision, and exactness. Every article used is absolutely pure. A number of chemists are employed to test the strength of each ingredient, so that its exact power and effect in combination with its co-ingredients is definitely known. Nothing is trusted to chance, and no person is employed in the preparation of the materials who is not an expert in his particular branch of the business. As a consequence, the Royal Baking Powder is of the highest grade of excellence, always pure, wholesome, and uniform in quality. Each box is exactly like every other, and will retain its powers and produce the same and the highest leavening effect in any climate, at any time. The Government Chemists, after having analyzed all the principal brands in the market, in their reports placed the Royal Baking Powder at the head of the list for strength, purity, and wholesomeness, and thousands of tests all over the country have further demonstrated the fact that its qualities are, in every
