EX-LT. GOVERNOR IMPROVES
 UTICA, Jan. 21 (P)—Former Lt. Gov. Ma William Bray, 58, whose right forearm was amputated yesterday because of critical burns, was in good condition today, the St. Elizabeth hospital reported. Bray, one-time State chairman of the Democratic party, was burned nine days ago in a bedroom fire at his home.

CHILDREN GET DIMES CARDS FROM SCHOOLS

Franklin county school children have been issued cards with slots for dimes—50 cents per child—to be filled during the current "March of Dimes" drive. The cards have been given to the students by teachers and will be returned through the schools to the County committee.

Franklin county was the first county in the United States to include the school children in the Dimes drive. In 1944 the children raised a total of \$3700, from which the 50 cents per capita quota was derived.

In Saranac Lake the Dimes drive is under the chairmanship of Charles Cowan, superintendent of schools. The children will be contributing towards a \$6000 Saranac Lake quota in the \$20,000 Franklin county goal.

3 Unions Block Labor Peace—Refuse Wage Boost Already Accepted by 19 Other Railroad Unions!

The Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen and the Switchmen's Union of North America, representing 125,000 railroad employees, have refused to accept the offer of the Railroads of a wage increase of 15½ cents an hour.

This is the same increase awarded 1,000,000 non-operating employees by an arbitration board in September, 1947.

This is the same increase accepted by 175,000 conductors, trainmen and switchmen by agreement on November 14, 1947.

Agreements have been made with 1,175,000 employees, represented by nineteen unions. But these three unions, representing only 125,000 men, are trying to get more. They are demanding also many new working rules not embraced in the settlement with the conductors and trainmen.

Incidentally, the Switchmen's Union of North America represents only about 7 per cent of all railroad switchmen, the other 93 per cent being represented by the Brotherhood of Railroad Trainmen and covered by the settlement with that union.

Strike Threat
 The leaders of these three unions spread a strike ballot while negotiations were still in progress. This is not a secret vote but is taken by union leaders and votes are signed by the employees in the presence of union representatives.

When direct negotiations failed, the leaders of these three unions refused to join the railroads in asking the National Mediation Board to attempt to settle the dispute, but the Board took jurisdiction at the request of the carriers and has been earnestly attempting since November 24, 1947, to bring about a settlement. The Board on January 15, 1948, announced its inability to reach a mediation settlement. The leaders of the unions rejected the request of the Mediation Board to arbitrate. The railroads accepted.

The Railway Labor Act provides for the appointment of a fact-finding board by the President.

The railroads feel it is due shippers, passengers, employees, stockholders, and the general public to know that throughout these negotiations and in mediation, they have not only exerted every effort to reach a fair and reasonable settlement, but they have also met every requirement of the Railway Labor Act respecting the negotiation, mediation, and arbitration of labor disputes.

It seems unthinkable that these three unions, representing less than 10 per cent of railroad employees, and those among the highest paid,

can successfully maintain the threat of a paralyzing strike against the interest of the entire country—and against 90 per cent of their fellow employees.

The threat of a strike cannot justify granting more favorable conditions to 125,000 employees than have already been put in effect for 1,175,000, nor will it alter the opposition of the railroads to unwarranted wage increases or to changes in working rules which are not justified.

A glance at the box shows what employees represented by the Engineers and Firemen make. They are among the highest paid in the ranks of labor in the United States, if not the highest.

Compare these wages with what you make!

Here is a comparison of average annual earnings of engineers and firemen for 1939 (pre-war) and 1947. Also shown is what 1947 earnings would have been if the 15½ cents per hour increase, offered by the railroads and rejected by the union leaders, had been in effect throughout the entire year 1947.	Type of Employee	1939 Average Annual Earnings	1947 Average Annual Earnings	1947 Average Annual Earnings with 15½ Cents per Hour Increase
