The Weather Forecast

Albany, N.Y. (AP) - Here are the winning numbers chosen for the New York State Lottery: Daily: 9-4-1; WinFour: 4-2-6-1; PlayNow: 9-2-4-1. The numbers were drawn from two barrels, one for the Daily numbers and one for the WinFour numbers. The PlayNow numbers were drawn from a third barrel.

New policy takes gifts from youths in facilities

By DAVID BARKER

ALBANY, N.Y. (AP) - The state has stopped playing Santa Claus to troubled youths locked up in state-run detention centers. More than 300 youths, including some who were convicted, received gifts from Santa Claus to troubled youths locked up in state-run detention centers. More than 300 youths, including some who were convicted, received gifts from Santa Claus.

Study: Risk of AIDS from transfusion smaller than thought

By DANIEL B. RANKIN

AIDS researchers have identified two genes that may reduce the risk of AIDS from a blood transfusion. These genes have been identified in a study of 450 blood donors who were tested for HIV antibodies. The study found that the risk of AIDS from a blood transfusion may be as low as 1 in 500,000.

For the fifth time in recent months: France detonates nuclear device

By CHRISTOPHER BROWN

Paris (AP) - A French nuclear blast in the South Pacific last month was the fifth in recent years to test the limits of world public opinion, which is growing more aware of the fact that nuclear testing is a major threat to the environment.

The French government has been criticized for its decision to test nuclear bombs, which it says is necessary for national security. The tests have drawn global condemnation and triggered sometimes violent protests, including a nuclear test in the South Pacific in 1995.

The latest French test was performed on December 23, 1995 in the South Pacific. The test was performed using a device that was slightly less than 20 kilotons.

The first test since 1996 exceeded the 20 kiloton limit set by the Comprehensive Test Ban Treaty (CTBT). The treaty, which was signed by 123 countries, including the United States and France, bans nuclear tests.

The French tests have been performed in the South Pacific, where the United States and France have nuclear test facilities. The tests have been performed in a region known for its crystal waters and have led the protests against French nuclear testing.
