**Evidence suggests existence of large natal gas reserves**

SARANAC LAKE, NY — Evidence exists that a pool of natural gas exists below the town of Saranac Lake. The evidence was discovered during an earthquake study conducted by the New York State Geological Survey. Experts estimate that the gas may be worth billions of dollars. The town has already filed a lawsuit against the state, seeking to recover the damages caused by the earthquake. The case is expected to go to trial next year.

**Buffalo fires city employees for not living within city limits as workers**

BUFFALO, NY — The city of Buffalo has fired three employees for not living within city limits as workers. The employees were fired for not living within the city limits as предусмотрено by the city's personnel rules. The city has a policy of firing employees who do not meet the residency requirement.

**Toddler hurt by line drive**

BUFFALO, NY — A toddler was injured when a line drive hit him in the head while he was playing at the park. The child is expected to recover after undergoing surgery.

**Winemakers attest: red wine good for the soul, and maybe the heart and mind**

BUFFALO, NY — Winemakers have long been advocates of red wine's health benefits. A recent study published in the Journal of American Medicine has shown that moderate consumption of red wine may reduce the risk of heart disease. The study, conducted by researchers at the University of Wisconsin, found that red wine drinkers had a lower risk of heart disease compared to those who did not drink.

**New York Wine and Grape Foundation President James Tregise**

BUFFALO, NY — James Tregise, President of the New York Wine and Grape Foundation, has spoken out in favor of red wine's health benefits. "Red wine is good for the soul, and maybe the heart and mind," he said. "Recent studies have shown that moderate consumption of red wine may reduce the risk of heart disease."
