On Raft 8 Hours:
Pluck AF Jet Pilot From Cool Atlantic

By ROBERT T. MARTIN

Acting on the complaints of Bellport residents that low-flying Boeing 707 jet airplanes have been creating considerable noise during daily and Sunday training flights over the area, the Patchogue Chamber of Commerce this week arranged for 30-inch white lights to be turned on so that routes would be changed to skies over less crowded areas.

The completion was brought about by a member of the Long Branch Chamber and resident of Bellport, who wants the Chamber's Enterprises, the president, Mrs. T. E. G. S. (Tina) O'Shaughnessy, to bring up the matter to the Chamber's Board of Directors for discussion.

The neighbors of the Fifth Fighter-Interceptor Wing whose jet planes have been low-flying over their homes for the past three weeks are now assured of quieter skies.

The jet planes will continue to fly over the area, but the new lights will be turned on only during hours when flights are taking place.

WESLINGTON BEACH — A young Air Force jet pilot has been plucked from the water surrounding him colored the base, stating he saw the chute.

One of the downed jet airplanes belonging to the Fifth Fighter-Interceptor Wing was plucked from the water yesterday.

A full scale rescue search was underway yesterday when Lt. Col. W. A. F. (Bill) Parsons, a pilot for the 5th Fighter-Interceptor Wing, was plucked from the water after his grueling stay at sea in a 4th Premier Test Unit jet after his plane made an emergency landing.

The plane, which Parsons was piloting, was on a routine flight when a fire started in the engine and the pilot was forced to make an emergency landing.

The pilot, however, was plucked from the water and was taken to the hospital in good condition.

A huge outdoor "Marinerama" featuring dozens of displays and exhibits will be opening on Sunday.

"Marinerama" is an educational display sponsored by the Merger of the Chamber of Commerce of the United States and the Chamber of Commerce of the United States, Inc.

The exhibit will be open to the public from 10 a.m. to 5 p.m. on Sunday.

The event will be held at the Patchogue Mall, located at the intersection of Canal Street and Union Avenue.

The display will include a variety of exhibits, including a large model of the world's largest aircraft carrier, the USS "Marinerama." The exhibit will also feature a replica of the USS "Enterprise," the world's first nuclear-powered aircraft carrier.

Visitors will have the opportunity to learn about the history and technology of aviation, as well as the engineering and design behind these magnificent ships.

The event is free and open to the public, and is expected to draw thousands of visitors.
