

Marion, N. Y., November 13, 1880.

Mixed Sweets.

Every industry is legitimate which takes any kind of raw material manufactures something more valuable from it and puts its true name upon the article.

From the testimony recently given in a law suit, it appeared that the profits realized by the Buffalo Grape Sugar Company during 1874-75, amounted to \$15,000 per month; they rose to \$20,000 a month in 1876 and had increased \$35,000 a month in 1877.

What becomes of the transformed cornstarch will be seen from the following extract of an official report sent home by the British Consul General Drummond:

The falsification of sugar and refined syrups by glucose has grown to such an extent that some of the largest refiners deemed it advisable to call the attention of their customers, by circular, to the necessity of protecting the public against such abuses through proper legislation.

In reality this is very simple. To suit the demands of trade the article (glucose) is manufactured in two forms, viz: as a concentrated liquid of gelatinous consistency; and as a white gritty powder similar to gluten.

Since liquid glucose is of a beautiful straw color, and of a viscous consistency. The falsifier purchases only an inferior kind of common molasses, worth 20 or 25 cents per gallon as the basis of his products, and mixes it, gallon for gallon or in various proportions, so as to correspond with the kind of syrups which he wishes to have, with glucose.

In the manufacturing of the higher and finer grades of yellow sugar, the glucose is used in the solid form. A low graded but pure sugar serves for this as a basis. And this is mixed with from 15 to 20 per centum of the white uncrystallized falsifying powder, whereby a bright amber colored pretty sugar is produced, which estimated by its color, stands even a little higher than the best kind of "standard A" of pure sugar.

talized falsifying powder, whereby a bright amber colored pretty sugar is produced, which estimated by its color, stands even a little higher than the best kind of "standard A" of pure sugar.

Examining the adulteration under a microscope, it appears in white dispersed amorphous grains, which only feebly transmit reflected light. With the polariscope this laevulose can be easily distinguished from the dextro-glucose, a natural constituent of the cane sugar, the latter turning the polarized light to the right, the former strongly to the left.

New Orleans Times.

EDUCATIONAL COLUMN. (Teachers and Educationists are invited to contribute to this column. Questions may be asked in relation to obstacles which may occur in the school room. Parents may question in relation to the training and government of children. We hope to make this department practical and instructive to all.)

Lectures, Educate.

The lecture season is upon us. As a means of moral good and intellectual strength, public lectures are well adapted. The common people need instruction. A large class are ignorant as to common things, and preeminently so as to the development of science. It is a notable fact that the class of people who most need instruction receive the least.

There is something awry about our lecture system. Men go upon the platform for money and speak to please. Like that press which administers to a vitiated taste, they give such as will be applauded. To remedy this evil, platform instruction should not depend on individual fees.

In the manufacturing of the higher and finer grades of yellow sugar, the glucose is used in the solid form. A low graded but pure sugar serves for this as a basis. And this is mixed with from 15 to 20 per centum of the white uncrystallized falsifying powder, whereby a bright amber colored pretty sugar is produced, which estimated by its color, stands even a little higher than the best kind of "standard A" of pure sugar.

The Bible in School.

Why not? Should it be anywhere, as a power of good? Then truly it should be where mind is daily being influenced for the duties and enjoyments of the great future.

Let the Catholic and Protestant bibles both, be in our schools, the Koran too—all in the same school if desired—each subject to the same rules of investigation and each received for the truth it contains.

Other books are made subject to demonstration, why not raise the Bible to the same noble level. That book of all others should be received upon merit and evidence. No man should be afraid of truth, and nowhere should its dawns be more common than in the school-room.

Put the Bible in the schools—have a daily "Bible class" there—the best means should be used to develop best men and women, and truth which makes free indeed, can never become less.

TEMPERANCE COLUMN.

Why stop drinking Alcohol?

In New York city, the money paid for beer alone, in a single day, would buy the bread for all the inhabitants of the city for the same length of time. In the states it would employ a public star instructor in every town, build a model school house in every school district, and surround the earth with a telegraphic wire.

1. It is a useless expenditure. 2. It injures the muscles, and prevents labor. 3. It weakens the brain—makes thought obsolete, and gives the whole moral nature to the direction of the devil.

GEMS OF THOUGHT.

"Think truly, and thy thought Shall be a fruitful seed."

Let no man presume to give advice to others that has not first given good counsel to himself.

The way for a man to secure himself from wickedness is to withdraw from the examples of it.

A FRIENDSHIP that makes the least noise is often the most useful; for which reason we should prefer a prudent friend to a zealous one.

HAVE the courage to show your respect for honesty in whatever guise it appears, and your contempt for dishonesty and duplicity by whomsoever exhibited.

We can not live on probabilities. The faith in which we can live bravely and die in peace must be a certainty, so far as it professes to be a faith at all, or it is nothing—Froide.

LEISURE is time for doing some thing useful; this leisure the diligent man will obtain, but the lazy man never; so that, as Poor Richard says, a life of leisure and a life of laziness are two things—Franklin.

You find yourself refreshed and presence of cheerful people. Why not make earnest effort to confer that pleasure on others?—You will find half the battle is gained if you never allow yourself to say anything gloomy.

CORRESPONDENCE.

Williamson Items.

Mr. Editor: I take my quill to report the proceedings of the great Garfield and Arthur ratification meeting held in this place last Saturday evening.

The boys in blue turned out in full force, giving us one of those grand displays which only our boys know how to give.

The speaking was most excellent, but we would make special mention of the fine oratory of Capt. Laing and Prof. D. D. Warner. These gentlemen made many good points and gave some very telling hits.

Sodus Items.

Louis H. Clark, of this village returned to his work of writing the history of Orange County, at Goslen, on Monday morning last.

The Republicans of this town had a ratification meeting here on Saturday night last, which was not very well attended.

The fall term of school at Sodas Academy closes on Friday November 19 with exercises in the Opera House in the evening.

Orvil Smith, of Brockport, was in town last week the guest of his daughter, Mrs. W. H. Richardson. A heavy wind visited this place on Saturday night but no damage has been reported as yet.

Dried apples are coming into town very freely, and are bringing from 3 to 6 cts. per pound. Barreled apples are also rushing in and are bringing an average about \$1.00 per barrel.

William R. Norris has engaged to teach the Sodas Point school during the coming winter.

News is scarce here this week everything having quieted down since election.

ANNOUNCEMENT.

Whenever you come to Marion and have a few minutes to spare, step in at LESSER'S (Clark's Block) and look at the many different goods kept in his little store. He is adding some new articles most every week to his stock and is selling as low as any large establishment in this or any other town.

A complete assortment of UNDERWEAR, WORSTED GOODS, YARNS, KNITTED HOSIERY, SKIRTS and NOTIONS can be seen now, and he respectfully invites his old patrons and all others to examine his goods and learn prices before purchasing elsewhere.

Marion Drug Store!

B. E. Luce,

To Consumptives.

The advertiser, having been permanently cured of that dread disease Consumption, by a simple remedy, is anxious to make known to his fellow sufferers the means of cure.

It is a simple remedy, and is so simple that any one can use it, and it is so cheap that it is within the reach of all.

It is a simple remedy, and is so simple that any one can use it, and it is so cheap that it is within the reach of all.

Pimples.

I will mail (free) the recipe for a simple VEGETABLE BALM that will remove TAN, FRECKLES, PIMPLES and BLOTCHES, leaving the skin soft, clear and beautiful; also instructions for producing a luxuriant growth of hair on a bald head or smooth face.
