Flaherty Funding now open in Newark

Flaherty Funding has opened a branch office at 165 East Union Street, Newark.

The office will serve a growing number of small business owners and other business people who are new to Newark. The office is the first of several planned branch offices in the region.

"We're excited about opening this office," said Vern Dueser, president of Flaherty Funding. "It will give us a new way to connect with businesses in the area, and help us provide the services they need to grow their businesses and create jobs."

The new office is located in the center of Newark, near many of the city's main business districts. It will be open from 8 a.m. to 5 p.m., Monday through Friday.

Saving the EPF

Recycling professionals from New York are joining environmental advocates in an effort to preserve the Environmental Protection Fund (EPF), a federal program that supports recycling and waste reduction.

The EPF provides financial assistance to states and communities for recycling and waste reduction projects. It was established in 1996 to help states and communities reduce the amount of waste sent to landfills and incinerators.

The EPF was created with the passage of the Solid Waste Disposal Act of 1986, which authorized the collection of $500 million in fees from large waste generators. The fees are used to fund the program.

The EPF has provided millions of dollars to states and communities for recycling and waste reduction projects. It has helped finance recycling centers, waste reduction programs, and other efforts to reduce the amount of waste sent to landfills and incinerators.

The EPF is facing cuts in funding, which could undermine its ability to support recycling and waste reduction projects.

"We're working to preserve the EPF because it's critical to protecting the environment and reducing waste," said John Horgan, a recycling professional from New York. "We're joining forces with environmental advocates to raise awareness about the importance of the EPF and to support efforts to preserve it."
