**State Quotas Under Teachers' Salary Bills**

Hutchinson Bill Provides \$400 Per Teacher, Lockwood Bill 50 per cent of Total Amount of Salaries.

Besides the differences as to the amount of salaries provided for teachers, there is also considerable difference between the provisions of the Lockwood bill and the Hutchinson bill as to the amount that the state shall pay toward the salaries of local teachers. Both of these bills provide amendments to the education law in respect to teachers' salaries and as to how the money is to be provided. These two measures have been the subject of considerable discussion in school circles of the city.

In the Hutchinson bill it is provided that the state shall pay an amount varying with the class of the city. For third-class cities, of which Geneva is one, the state is to pay \$400 toward the salary of each teacher. As Geneva employs 72 teachers it would receive as its teachers' quota under this bill \$28,800.

On the other hand under the Lockwood bill the state will pay an amount equal to 50 per cent of the salaries paid to teachers during the year prior to the apportionment. As the total amount to be expended this year for teachers' salaries will be \$72,696, Geneva would receive a quota under this bill of \$36,300 in round numbers.

**RECRUITING OFFICER IN TOWN.**  
Captain R. S. Atwood of the 52nd Railway Artillery, on his way from Syracuse to Albany stopped over in town yesterday to visit the recruiting party of the 52nd Regiment which is here at present and also the local party. Captain Atwood has charge of two different parties from the 52nd, one with headquarters in Albany and the other at Syracuse.

**DEMONSTRATING NEW TELEPHONE**

**Trial Set of Instruments On Exhibition at Company's Office on Seneca Street**

The New York Telephone Company has progressed sufficiently in its work of installing its new automatic telephone system in Geneva so that it now desires the general public and its patrons in particular to acquaint themselves with the details of the operation of the new system.

In the show window of its temporary office of Seneca street a trial set of instruments has been installed with the working mechanism in plain view and the employees of the company for the last day or two have been busy explaining the workings of the system to curious ones who have called in to inquire about it.

The company plans to put on an educational campaign next week and urges everybody who will have occasion to make use of the new system to call at the office and learn how to operate it. A clerk will be in constant attendance and will explain every detail. There will also be a pamphlet given out that will explain every operation that will be necessary to go through in using the new automatic phone.

The officials of the company predict that the system will work perfectly when it is completed and desire the patrons to acquaint themselves with its intricacies, inasmuch as a large portion of the success of the system will depend upon the patrons themselves.

**Would Increase Park Space at the Lake Front**

With the project of acquiring the old canal before the public enthusiasts of a lake side park at the foot of Seneca lake are dwelling upon their hobby just now and the lake front is attracting more attention than usual.

One interested citizen comes to the fore with the suggestion that in the contemplation of the plans for the distant future the obvious necessities of the present should not be overlooked and calls attention to the bad state of repair in which the sea wall along the shore is at present.

The sea wall will need repair, or rebuilding, in the course of one or two years, this advocate states, and advises that, if Geneva has its heart set on acquiring a park along the lake front, steps should be taken to have the sea wall moved a hundred or more feet in to the lake at the time it is rebuilt. The water is very shallow at the point it is contended, and any sea wall constructed will have to be a wet wall of substantial character. Such a wall could be constructed one hundred feet out in the lake with very little added expense and would provide a magnificent park levee. The present wall is what is known as a dry wall and has not been able to stand the buffeting of the waves at high water.

**SENECA CASTLE**

Seneca Castle March 30—A surprise was given Mrs. Hattie Jones at her home on Saturday night by her brother and sisters and their families to the number of about 20. Refreshments were served.

Miss Fella Warner of Naples returned home today after spending about a week at the John Cairns home.

Mrs. Court of Rochester was home over Sunday.

Miss Winifred Fairchild of Washington, D. C. came home Sunday for a week's vacation.

Mrs. Mary Huggison is spending a few days with friends in town.

**Presbyterian Church Notes.**  
Seneca Castle, March 30—An unusually interesting service was held in the Presbyterian church on Sunday morning when twelve persons united with the church on confession of faith. There was six baptisms.

The Woman's Home and Foreign Missionary Society will hold its quarterly meeting and tea on Wednesday afternoon at 2:30 o'clock in the church parlors. As it is the first meeting of the church year it is urged that all the members and women of the congregation attend.

On Thursday afternoon at three o'clock in the chapel there will be a meeting of the Session, Board of Trustees and all who have aided in the financial canvass for current and new era budgets.

Thursday evening prayer meeting at 7:30 o'clock. The theme: "The Crucifixion." Junior Endeavor will meet at close of the public schools at the manse.

**Correct Easter Attire**

To appreciate how well we are prepared to provide for your Easter wardrobe it will be necessary for you to view our displays and give them leisure inspection.

You can ask for some particular garment, Suit, Coat, Waist, Dress or Skirt in some particular style and material, but that we can present you with, at a very attractive price—a price which will be unusually low for a garment of such exceptionally high quality. Our styles are individual and you may be sure of an excellent Easter selection if you come in now.

**Easter Coats**  
Distinctive individuality! Developed in fine Bolivia, Polo Cloth, Camel Hair, Polo, Silver-tone, Tweeds, Serge and Jersey. Strictly tailored coats, some beautifully lined, in the popular three quarter as well as full length.

**BIG BAG**

**PAYN'S PLAIN CLIPPINGS** 10c

UNION MADE

Payn's Plain Clippings are nothing but pure, natural tobacco. They fill the bill for men who like a mellow, full bodied smoke or chew. You get your money's worth in satisfaction every time.

B. Payn's Sons Tobacco Co., Albany, N.Y.

**Plywood in Airplane Construction.**  
Plywood is wood of any variety that has been cut by a machine into thin layers and glued together again in such a way that the grain of one layer runs at an angle to the grain of two adjacent layers. The strength of a plywood panel, in two planes, greatly exceeds that of steel. With some wood, by combining cuts, it is even possible to get greater resistance to stress in all three planes than steel affords, though it is rarely necessary to go so far. Ordinary wood used for airplane construction is not required to withstand severe stresses in more than two planes. What plywood means to airplane construction is well illustrated by the De Havilland-4. Before that method of using wood was invented the best airplane wing rib weighed 7.95 ounces, and was capable of sustaining a load of only 89 pounds. Since then the plywood rib used on the De Havilland weighs 5.12 ounces and will carry a load of 274 pounds.—Popular Mechanics Magazine.

**Luminous Dials Popular.**  
The radium watch industry, which has grown in a few years to such large proportions, began with the production of one watch in 1903 by the scientist Dr. George F. Kunz. During 1908-10 a few hundred such watches were imported and sold under patents owned by a large American radium company. From 1910 until the present time the industry has grown steadily. In 1913 about 2,500 radium watches and clocks were sold in the United States, and by 1915 there was more than a five fold increase in this number. From these small beginnings the use of radio-luminous compound has grown into an industry with an output which in 1919 approximated 2,200,000 American high-grade and cheap watches and clocks and upward of 500,000 imported timepieces.

**Scots Spurn Sunday Work.**  
Lord Leverhulme has encountered the religious prejudices of the Scotsmen who live on the extensive property he has purchased in the Outer Hebrides and has suffered a rebuff. He had planned to make Stornoway, on the island of Lewis, the headquarters of a huge fishing fleet that would sweep the seas for 500 miles around. The project involved Sunday labor, and the islanders, who adhere to the strict and intense form of the Presbyterian faith, rejected it.

Commenting on the incident, the London periodical, Common Sense, says: "Lord Leverhulme is a man of big ideas and new ideas, while the population over whom he has declared the rights of lordship are folk of old and intense ideas. Hence the inevitable collision."

**WAR CHEST SUBSCRIBERS**

**Who Have Paid Their Subscriptions IN FULL**

Will receive a refund of 12%. To avoid the expense and labor of mailing, subscribers are requested to call at the Geneva Trust Company for their checks on or after Monday, March 29th. A final dividend will be paid later.

**CONTROLLED POWER**

The power of the Pierce-Arrow Dual Valve Six, mighty as it is, carries no element of danger. Creating this added motive force without increasing the size or the number of cylinders is no greater achievement than placing that power under the absolute control of the man behind the wheel.

The Power available is limitless; the power used is whatever the driver decides.

To crawl along at three miles an hour, breeze along at thirty, or burn up the road at seventy-five, is optional with the operator—the Pierce-Arrow simply complies.
