

EXPLANATIONS.

Cincinnatus, of Rome, emerged from retirement only when his country was in peril, and his countrymen called loudly for his services.

So MAN, after the election of last year, failed to hear a distinctive call to the field. His retirement was not to be permanent, however. The Liberal League need him and find him ready for the fray.

When saints like Wright and Pillsbury, and pure heroes of the stamp of Wakeman, Parton and Leland become the victims of jealous slurs, foul aspersions and vile abuse, such as has burdened the public press since the 18th of September, it is time for MAN to come to the rescue.

Dropping for the present the allegorical, I have to say, that my affairs having become too deeply embarrassed, I found it expedient to drop the publication of MAN in December last, and that of the EVOLUTION in April. My affairs, with the assistance of powerful friends, have been so far adjusted that the SCIENTIFIC MAN and EVOLUTION are absolutely guaranteed for regular publication until January 1st, 1882. We must rely upon the efforts of our subscribers for the elements of a permanent and complete success. This work is mainly a missionary or educative work, and educators were always poorly paid. Missionaries are seldom welcome, and they must have support from home. The response to the first issue of MAN was hearty enough to show that man has his place in the breasts of the Liberals. The monthly publication is guaranteed by the Liberal League, and they are responsible editorially and otherwise for one number per month. Once a month we desire to treat our readers to one of Mrs. Besant's Essays, not as yet published in America. Once a month we wish to print an article on Anthropology, Ethnology and Archaeology in recognition that "The proper study of mankind is man."

Once per month also in MAN we desire to print some leading essay upon sanitary and medical reform. And we desire to give a brief synopsis of the news of the week, which most concerns MAN, and especially the LIBERAL MAN.

Whether we succeed in all our desires for this paper is for its other friends largely to determine. Our part will be to deserve, and theirs to appreciate. In its League issue at 25 cents, it is certainly within the reach of 100,000 American Liberals. In its weekly issue at \$1.00 per year, it will richly repay all who may save from their tobacco and liquor bills the small sum of 2 cents per week.

For clubbing rates, &c., see our advertising pages, and address promptly,

ASA K. BUTTS,

MANY of our enthusiastic friends, in their admiration for these lectures for the people, have expressed their fear that the supply would soon run short. We take this occasion to reassure them that the stream is really perennial. We give herewith a partial list of those we have just received, which were delivered last season in Manchester and other places in England. We shall publish them as fast as we can, and in such order as may the least interfere with another very interesting series of illustrated articles, entitled *Physics Without Apparatus*, the first number of which will appear in the next number of the SCIENTIFIC MAN. The following is partial list of the new lectures: Islands, as Illustrating the Laws of the Geographic Distribution of Animals, by Arthur R. Wallace, F.R.G.S., F.L.S. The Age of Dragons, by B. Waterhouse Hawkins, F.G.S. Palestine in its Physical Aspects, by Canon Tristram, L.L.D., F.R.S. Traps to Catch Sunbeams, by Capt. W. De W. Abney, F.R.L., R. E. Edison and some of his inventions, by Prof. Barrett, F.R.S., R.E. Our Earliest Ancestors in Britain, by Prof. Boyd Dawkins, M.A., F.R.S., F.S.A. The Modern History of Gunpowder, by Prof. Abel, C.B., F.R.S. Minute Forms of Life, by Rev. W. H. Dallinger, F.R.M.S. Animal Intelligence, by George S. Romanes, Esq., M.A., F.L.S. The Popular Health Lectures will be published in our other periodical MAN.

THE FOLLOWING WILL APPEAR IN "MAN."

Long Life, and the Causes that prevent it; By Arthur Ransome, M.D., M.A. Work and Recreation in their relation to Health; By S. Hoigate Owen, M.D. Defective Drainage as a Cause of Disease; By John Makinson Fox. Good Nursing, and its Importance in the treatment of Disease; By J. A. Irwin, M.A., M.D., &c. The Loss of Wealth by the loss of Health; By John Watts, Ph.D. How a Tenant may keep his Cottage Healthy and Comfortable; By J. Corbett.

POPULAR SCIENCE.

List of Lectures already issued in press for Vol. II., SCIENTIFIC MAN.

- No. 1. The Health of the Household. By Henry Simpson, M.D.
- No. 2. The Crime of Vaccination. By Prof. Alexander Wilder.
- No. 3. Adulteration of Food. By C. Estcourt, Esq., F.R.S.
- No. 4. Why Little Children Die. By H. H. Vernon, M.D.
- No. 5. Kent's Cavern. By William Pengelly, Esq., F.R.S.
- No. 6. The Time that has Elapsed since the Era of the Cave Men of Devonshire. By Wm. Pengelly, Esq., F.R.S.
- No. 8. The Origin of the English People. By Prof. A. S. Wilkins, M.A.
- No. 9. Modern Savages. By Sir John Lubbock Bart, M.P., F.R.S.

- No. 10. Epidemic Delusions. By Dr. Carpenter, F.R.S.
 - No. 11. Harvey and the Circulation of the Blood. By Prof. Huxley, F.R.S.
 - No. 12. Muscle and Nerve. By Prof. Arthur Gamgee, M.D., F.R.S.
 - No. 13. The Functions of the Brain. By Prof. Ferrier, M.D.
 - No. 14. The Beginnings of Life. By Prof. P. Martin Duncan, F.R.S.
 - No. 15. The same, Part II, by the same.
 - No. 16. Astronomy. By Prof. Proctor, and Scientific Feeding, By Prof. Wilder.
 - No. 17. Flame. By Prof. T. E. C. Thorpe.
 - No. 18. Flame, Part II. By Prof. T. E. C. Thorpe, F.R.S.
 - No. 19. Earthquakes and Volcanoes. By Prof. W. C. Williamson, F.R.S.
 - No. 20. Heredity. By Wiley Britton.
 - No. 21. Modern Discoveries in Sound. By Prof. T. H. Core.
 - No. 22. Second Lecture on Sound, by the same.
 - No. 23. How to Live Well on a Sixpence a Day. By Dr. T. L. Nichols, of London.
 - No. 24. The Cruise of The Challenger. By John Murray, F.R.S.E.
 - No. 25. Second Challenger Lecture, by the same.
 - No. 26. Palestine Explorations; The Ancient and Modern Water Supply of Jerusalem. By Major Wilson, R.E., F.R.S.
- Nearly every number is illustrated, and contains besides lectures as above recent Notes of Science. Price 2 cents per number or the 26 nos. for 50 cents, sent postpaid by

ASA K. BUTTS, 13 Dey Street, N. Y.

THE SCIENTIFIC MAN.

PRINCIPAL CONTENTS OF VOL. I.

No.	Description and List of Lectures.	Page
No. 1.	Elementary Chemistry, by Professor Roscoe, F.R.S. Lecture I.—Indestructibility of Matter and of Energy. Parasites, and Their Strange Uses, by T. Spencer Cobbold, Esq., M.D., F.R.S.	1
No. 2.	Elementary Chemistry, by Prof. Roscoe. Lecture II.—Chemical Combination. Sea Serpent Explained. Societies and Academies.	6
No. 3.	Early Man in North America, by Prof. Grote. Lecture III., by Prof. Roscoe. Scientific Notes (in nearly all following numbers).	17
No. 4.	Elementary Chemistry, by Prof. Roscoe. Lecture IV.	25
No. 5.	Zoology, or Four Plans of Animal Creation, by T. Alcock, M.D. Lecture I. Artificial Mirage.	26
No. 6.	Zoology, or Four Plans of Animal Creation. Lecture II.	41
No. 7.	Zoology, or Four Plans of Animal Creation. Lecture III.	49
No. 8.	Zoology, or Four Plans of Animal Creation. Lecture IV.	57
No. 9.	The Natural History of Paving Stones. By Prof. Williamson, F.R.S.	65
No. 10.	Flame. A lecture by Prof. Core.	73
No. 11.	A Lecture by Prof. Tyndall, F.R.S., on "Crystalline and Molecular Forces."	81
No. 12.	On Coal: Its importance in "Manufactures and Trade," by Professor W. S. Jevons, M. A.	90
No. 13.	On Coal. A lecture by W. Boyd Dawkins, Esq., M.A., F.R.S., F.G.S.	97
No. 14.	An article by Prof. W. Stanley Jevons, on "The Amusements of the People."	105
No. 15.	John Dalton and his Atomic Theory. A lecture by Prof. Roscoe.	113
No. 16.	More about Coal. How Coal and the Strata in which it is found were Formed. With illustrated diagrams. By A. H. Green, M.A., F.G.S.	121
No. 17.	On Coal Colors, by Prof. Roscoe.	129
No. 18.	The Ice Age in Britain, by Prof. Geikie, F.R.S.	137
No. 19.	Coral and Coral Reefs, by Prof. Huxley, LL.D., F.R.S., New Guinea, by Alfred R. Wallace.	145
No. 20.	The Temperature and Life of the Deep Sea, by Dr. W. B. Carpenter, F.R.S.	153
No. 21.	Spectrum Analysis, by Prof. Roscoe.	161
No. 22.	Spectrum Analysis in its Application to the Heavenly Bodies, by W. Huggins, LL.D., D.C.L., F.R.S.	169
No. 23.	Two Lectures on Elementary Physiology, by John Edward Morgan, M.D.	177
No. 24.	Third Lecture by John Edward Morgan, M.D.	185
No. 25.	Fourth Lecture.	193
No. 26.	On the Sun, (Illustrated,) by J. N. Lockyer, Esq., F.R.S.	201
No. 27.	Yeast, by Prof. Huxley.	209
No. 28.	The Food of Plants, by Prof. Odling.	217
No. 29.	The Progress of Sanitary Science, by Prof. Roscoe.	225
No. 30.	How Flowers are Fertilized, by Alfred W. Bennett, M.A., B.Sc., F.L.S.	233
No. 31.	Food, by Prof. Armstrong.	241
No. 32.	The Interior of the Earth, Prof. Crookes' Experiments, etc.	249
No. 33.	The Migration of Birds, by Prof. August Weismann.	257
No. 34.	The Barbarisms of Civilization, by Prof. F. W. Newman.	265
No. 35.	Animal Mechanics, by S. M. Bradley, Esq., F.R.C.S.	273
No. 36.	Carnivorous Plants, by Ellice Hopkins.	281
No. 37.	Electrical Discoveries of Faraday, by W. F. Barrett, Esq.	289
No. 38.	The Life of Faraday, by Dr. J. H. Gladstone, F.R.S.	297
No. 39.	Pure Air, and its Influence upon Health, by A. Ransome, M.A., M.D., Professor of Hygiene and Public Health, Owens College, and Examiner in Hygiene, Cambridge University.	305
No. 40.	The Rainbow (with drawings) by Prof. Roscoe, F.R.S.	313
No. 41.	The Sun and the Earth, by Prof. Balfour Stewart, F.R.S.	321
No. 42.	Geographical Distribution of Mammals, by T. L. Sclater, Esq., M.A., F.R.S.	329
No. 43.	The Birds of the Globe, by R. Rowdler Sharpe, F.L.S.	337
No. 44.	Atoms, by Prof. Clifford, M.A.	344
No. 45.	How the Body May be Influenced by the Mind in Sickness and Health, by Henry Simpson, M.D.	353
No. 46.	Gun Cotton, by F. A. Able, Esq., F.R.S.	361
No. 47.	Soap Bubbles by Prof. Bucker.	369
No. 48.	The Star Depths, by Prof. Richard A. Proctor.	377
No. 49.	Science and Aesthetics, by Prof. A. R. Grote.	385
No. 50.	Polarisation of Light, by Wm. Spottiswoods, F.R.S.	393
No. 51.	The Genesis, by Prof. Croom Robertson, M.A.	401
No. 52.	The Unconscious Action of the Brain, by Dr. Carpenter, F.R.S.	409

Any of the above can be sent prepaid for 2c. each, 52 (1 of each) for \$1.00, four of each, (208 in all) for \$3.00, 10 of each, (520 in all) \$6.00.

Vol. I, bound (consisting of above Lectures and several hundred interesting and reliable "Scientific Notes," in full cloth, ornamented sides, gilt stamp and trimmed edges, with or without advertising pages, by mail, prepaid, \$1.50. Club rates on bound volumes same as above on the unbound, with postage added, 4 copies bound, complete, \$4.50; 10 copies bound, complete, \$9.00.
