HOME AIR CONDITIONING BASIS OF INDUSTRIAL DEVELOPMENT THAT WILL REVIVE PROSPERITY

Twenty-Five Million American Homes in Need of Its Benefits, States Dr. Hill.

CHICAGO, Ill.—"Transition of the furnace into an air-conditioning plant, makes residential heating systems now used as much out of date as the old-fashioned ice-box or kitchen range," declared Dr. E. Vernon Hill, dean of American air-conditioning scientists, and editor of the Aerologist, a national publication devoted to the science of heating, ventilating and air-conditioning.

"Air-conditioning, for the 25,000,000 homes in America, as well as the almost innumerable commercial, public and industrial buildings, is the new innovation that fills, in the parlance of the business man, 'a felt but unknown want.' It is the basis of a new industrial development that will be instrumental in reviving prosperity and which will be a balance-wheel that will keep prosperity on an even keel for many years to come."

This statement is based on the fact that the American public has become familiar with the comforts and benefits of air-conditioning through the perfected systems now used in the better theaters, public buildings and in many lines of industry. "This has resulted," he said, "in demand for air-conditioning in the home," and he expressed the opinion that when the American public fully recognizes the benefits imparted by air-conditioning from the standpoints of health and comfort, air-conditioning will be looked upon as more of a necessity than the radio or even the automobile.

"No home need be without the comforts and healthfulness of air-conditioning," Doctor Hill continued. "There is now available to any home owner who can afford the usual type central heating plant, a heating-air-conditioning system that automatically performs the important functions of air-conditioning. Thermostatically controlled, these systems, in addition to supplying the warmth essential to winter comfort, also automatically supply the home air with sufficient moisture to offset the indoor dryness characteristic of winter heating.

"They also meet another vital requirement of air-conditioning, namely, constant air circulation, by means of a thermostatically controlled air circulating unit. This air circulation is draftless, yet of sufficient force to keep the air in every room constantly moving, changing it from four to six times per hour. An outstanding benefit of this air motion is the development of an indoor temperature that is practically uniform in every room at floor and ceiling levels.

Dr. E. Vernon Hill, Chicago, eminent aerologist and dean of American air-conditioning engineers, who states that home air-conditioning is the basis of an industrial development that will revive prosperity.

"This unit likewise makes the heating system available for cooling purposes during the hot periods of summer. The air motion eliminates the stagnant air conditions that characterize home interiors in hot weather and, by keeping the air in constant circulation through the cool basement, tends to modify the temperature. Its most important benefit, however, is the gentle air motion which produces a physical comfort commensurate with that obtained by lowering the temperature several degrees.

"Thermostatically controlled home air-conditioning systems now available are dependably efficient, moderate priced and practically fool-proof. Their use, in conjunction with oil burning equipment, gas burners, or automatic stokers for coal, virtually eliminate all of the drudgery, discomfort, and inconvenience that heretofore have characterized home heating.

"Obviously," he said in conclusion, "public demand for domestic air-conditioning will be almost unlimited, for air-conditioning systems are indispensable to sound health and they impart a genuine indoor comfort that is now experienced in but few homes or places. Public acceptance of the new idea in year 'round air conditioning, will, in effect, render practically all existing housing obsolete."

Roast Duck Will Be Bird For Thanksgiving

[illegible] roast duck is [illegible] choice for the [illegible] dinner. Lovers of [illegible] not demands at [illegible] of fresh fruits and [illegible] especially the tart fruits [illegible] vegetables.

Whether cutting with duck seems to be [illegible] favor in most sections of the country, but for [illegible] nuts are becoming more and more expensive each year. With economy playing a large part in our modern day thinking we would not try a peanut stuffing "that gives." Peanut stuffing flavored with a bit of minced onion and moistened with evaporated milk makes a choice portion that even our New England grandmothers will appreciate.

Brussels sprouts with Mock Hollandaise Sauce is different and a most tempting addition to the main dish.

Instead of the traditional apple sauce give the family a real treat for dessert—a Dutch Apple Pie. It is certainly much less expensive when evaporated milk is used instead of cream, and best of all, there is no extra fat which may be a problem with some.

Thanksgiving Dinner Menu

Cream of Tomato Soup
Roast Duck Peanut Stuffing
Brussels Sprouts with
Hollandaise Sauce
Rolls Butter
Perfection Salad Mayonnaise
Dutch Apple Pie

Cream of Tomato Soup

3½ cups tomatoes (1 No. 2½ can)	1 tsp. salt
2 slices onion	Dash of pepper
6 cloves	1½ cups boiling water
2¼ tsp. sugar	1¼ cups evaporated milk
2½ tbsp. butter	
3 tbsp. flour	

Boil tomatoes with seasonings 5 minutes, then rub through a sieve. There should be 2 cups liquid and pulp. If not, add water. In the meantime prepare a white sauce of the remaining ingredients. When ready to serve, pour tomato mixture slowly into hot white sauce, stirring to blend well. Yield: 6 servings.

Mock Hollandaise Sauce

1 tbsp. butter	Few grains cayenne
2 tbsp. flour	2 egg yolks
¾ cup evaporated milk	½ cup butter
½ tsp. salt	1 tbsp. lemon juice
⅛ tsp. pepper	

Prepare a white sauce of 1 tbsp. butter, the flour, milk, salt, pepper and cayenne. Remove from fire and stir in beaten egg yolks. Add ½ cup of butter in small pieces and lemon juice. Yield: 6 servings.

Peanut Stuffing

1 tsp. minced onion	½ cup ground peanuts
1 tbsp. butter	1 tsp. salt
1 cup fine dry bread crumbs	Cayenne
	½ cup evaporated milk

Cook onion slowly in butter 5 minutes. Add bread crumbs, peanuts, salt and a dash of cayenne. Soften with the evaporated milk. Yield: 1 2/3 cups, sufficient for 1 duck.

Mayonnaise

2 tbsp. butter	1 tbsp. sugar
4 tbsp. flour	½ tsp dry mustard
½ cup boiling water	Dash of cayenne
½ cup evaporated milk	½ tsp. paprika
1 tsp. salt	White pepper
1 cup salad oil	2 tbsp lemon juice
2 egg yolks	1 tbsp. vinegar

Prepare a white sauce of the butter, flour, water, milk and salt. Put all other ingredients except lemon juice and vinegar into a bowl. Add hot white sauce and beat until thick and smooth. Add lemon juice and vinegar and beat thoroughly. One whole egg may be used in place of 2 egg yolks and vinegar may be substituted for part or all of the lemon juice. If salad dressing does not begin to emulsify after beating 2 to 3 minutes let stand half an hour, then finish beating. Yield: 2 cups.

Dutch Apple Pie

1 qt. sliced apples	1 cup evaporated milk
Nutmeg	1½ cups sugar

Turn apples into pie tin lined with Plain Pastry. Sprinkle with nutmeg. Place strips of pastry across pie to form cross bars. Boil milk and sugar to a thick syrup about 10 minutes. Pour over pie. Bake in a hot oven (425°F.) 10 minutes, then a moderate oven (350° F.) 50 minutes longer, or until apples are tender. Yield: 1 pie.

Value!

Here's an extra measure for you

Buffalonian Overcoat
from Hart Schaffner & Marx

Now $25

HERE'S a coat that in the average store would sell for quite a bit more money. But at Kleinhans you share in the savings that tremendous volume brings. We're glad to share it, too. That's what has made Kleinhans the largest clothing business between New York and Chicago. Men like to buy here because they get more value for their dollar—always.

In the new Buffalonian overcoat you get better quality at a lower price—$25. You get rich, warm, fleecy woolens in the smart new shades of Corona brown, Dusk blue and Jet gray. Choose from smart single- and double-breasted models. Buy with confidence—"satisfaction or your money back guaranteed."

Thrift Basement Boys' Overcoats

Boys' overcoats must be warm and stylish. Come in and see these dandy new models in attractive all-wool mixtures. They're a wonderful buy at $8.75. Sizes 10 to 18.

$8.75

Thrift Basement Prep Overcoats
$12.75

Finer Quality Overcoats from Fashion Park and Hart Schaffner & Marx
$33.50 to $65

Thrift Basement Men's All-wool Overcoats
$19.50

The KLEINHANS Co.
