RAIL-ROAD,--NO. 3.

December 27th, we submitted to our readers such particulars as a happy investigation of the subject enabled us to compile, relative to the method of constructing railways, and their general and comparative advantages as mediums of transportation.

more gradual; being about six hundred and fifty feet in a distance of about twelve or fourteen miles. The descent there is Owego; is about one hundred and eighty feet; and the surface of the ground, soil, and other circumstances, are the same as before stated.

to the Erie Canal, and thence to the New-York market. And there is also another important consideration, in which the State of New-York has a deep and peculiar interest. The manufacture of Salt in this State is yearly increasing; and the supply of fuel for the works is rapidly diminishing.

REPORT FROM GREECE. By late arrivals at New-York, from the British and other vessels, we have the gratifying intelligence of the almost total destruction of the Turkish fleet, by the British and Russian squadrons, on the 22nd of October.
