The Bitters are now among the most popular and the same has always been the case in the medical world. Before purchasing go to the place where you are sure to find a thing that has a great service to among so well as their many excellent qualities, and speedy action in all cases where the disease is caused by irregularity of the digestive organs. DR. C. W. HERMANCE'S
CELEBRATED
DIPHTHERIA COMPOUND

IS everywhere the peoples' acknowledged antidote for that terrible disease—

Putrid Sore Throat,

and the success that has attended its use is unparalleled in the History of Medicine.—But not withstanding the lives it has rescued from an early grave, the sighs it has lulled on the Breast of Affection and the tears it has dried on the face of anticipated Orphanage, it was with diffidence the author presented it to an afflicted World, knowing as he did that the hopes of many afflicted ones have been crushed by the reliance they have placed on worthless things But this remedy will satisfy the most skeptical, on a fair trial, that to such a class it does not belong. It comes before the world bearing with it the evidence of multitudes who remain living monuments bearing testimony to its beneficial effects in the removal of this too often fatal disease.

The vacant chair at the fire side and the broken link in many a family circle bear testimony that the remedies usually relied on have proved of no avail. They however dent is the duty of every one to provide themselves with a remedy while in health that will enable them to battle successfully with the monster and divest him of his terror and when he shall visit your circle compell him to fall harmless at your feet.

The preservation of life and health is the first grand object to which we feel our needs ordinarily directed, and no remedy could promote that object [illegible] our highest consideration [illegible] Such are blessings that cannot be purchased [illegible] too dear.

Each succeeding year [illegible] testimonials of its [illegible] are daily received, from persons who have used it in their families, and by physicians who have prescribed it in their practice, and the following testimonials from reliable and well known persons who have suffered and been restored to health, or out of the many we have published:

TROY N. Y. December 1 62

DR. C. W. HERMANCE: Dear Sir:—Although I have never had the pleasure of a personal acquaintance with you, yet I feel to address you as an intimate friend in view of the benefit I have experienced by the use of that medicine, prepared by you, called the "Diphtheria Compound." About two weeks ago, I was visiting a friend, when I was suddenly taken with what the physician called putrid sore throat, and finding that his remedies availed nothing, my neck swelling and becoming more painful all the time, I waited to try the virtues of your highly recommended patent secret remedy by the advice of a kind neighbor who was in possession of a bottle, and relieved it to me for a trial; and in justice to you I must confess that too much cannot be said in its favor, for in a short time after taking some my neck grew less painful and the swelling and inflammation diminished so rapid, that in six hours I could swallow about as well as ever, and in three days I considered myself well. All honor is due your valuable medicine for my speedy recovery, which I think would have been doubtful but for its timely aid. I would not be without it for ten times its cost, and knowing, as I do its value I will recommend it in the strongest terms to every sufferer—The remedy to counteract that dreadful disease has long been sought after, and truly it is at last found. In conclusion, if this letter or any part of it, is considered by you of any use for publication you are at liberty to use it, for if this should ever prove instrumental in saving one mother from such a terrible death I should feel more than fully recompensed for voluntarily trespassing upon your patience by a recital of my affliction.

Yours, truly
LYMAN THOMAS.

CORINTH Saratoga Co Dec. 1862

DR. C. W. HERMANCE: Dear Sir:—Putrid Sore Throat is prevailing to an alarming extent in this section. On the 30th of last month I was attacked with that much dread of disease, and having previously heard of the success of your Diphtheria Compound, I was induced to try it myself, and with the most satisfactory result of being restored to health in a few days. I believe it to be the best remedy for that disease in use, and with its success in my case, as well as others in this vicinity, I can most heartily recommend it to all suffering with disease of the throat. It is used with good success by many of my neighbors. The above facts I will substantiate, if necessary, at any time.

HARRISON CLOTHIER

HALF MOON, Saratoga Co., Dec., 1862

DR. C. W. HERMANCE: Having used your Diphtheria Medicine I can say, as a testimony in its favor, that it is all it is recommended to be and would advise every family to provide themselves with a bottle, and when they do diphtheria will cease to be a prevailing disease. E EDDY.

CLIFTON PARK JAN. 1863.

DR. C. W. HERMANCE: DEAR SIR:—This certifies that my daughter aged 15 years has been for some time afflicted with sore throat, and although under the care of a physician could obtain no relief until I purchased a bottle of your invaluable Diphtheria Compound which had the desired effect and accomplished a speedy cure. I consider it a medicine of inestimable value, and will do all in my power to relieve the suffering by spreading the reputation it has so meritoriously gained. JOEL HUBBS.

All desiring further evidence can obtain it by addressing or calling on the Dr. in person who is ready at all times to convince the kepticle, and remove the error of prejudicial minds.

FLAX & HEMP DRESSER.

Send for Descriptive circular.

MALTA, SARATOGA CO., N. Y., Aug. 10, '63.

MESSRS. MALLORY & SANFORD:—GENTS—On the 19th day of March we drew to the mill of N. G. Akin thirty nine hundred and thirty (3930) pounds of flax straw, which he dressed through the Old Brake, and we received four hundred and eighty-one (481) pounds dressed flax.

We, about the first of June drew to the mill of Wm. H. Buckley forty four hundred and ten (4410) pounds of flax straw, which was dressed through one of your Patent Flax Brakes; we received eight hundred and five (805) pounds of dressed flax.

The flax was grown on the same piece of land, and there was no perceptible difference in the quality of the flax except that the portion drawn to Akin's mill was rotted in the fall of 1862 and that drawn to Mr. Buckley's mill was spring rotted which is considered not as good, from the fact that it loses part of the oily matter from the fibre, and does not yield as much per ton of straw as the fall rotten.

You will perceive by the above statement that we received from Mr Akin's mill 245 pounds nearly of dressed flax per ton of straw and from Mr. Buckley's mill 365 pounds of dressed flax per ton, which makes 120 pounds per ton in favor of your Brakes.

We are recommending our neighbors to take their flax to one of your Brakes to have it dressed although it is fifteen miles to the nearest one at present.

J. B. WEEKS,
L. L. WEEKS.

I certify that the above statement is correct, as I saw the Weigher's receipts for both lots of straw, and weighed the dressed flax myself that was dressed at my mill. The flax dressed at Mr Akin's mill is correct, no doubt, as the above gentlemen are perfectly reliable.

WM. H. BUCKLEY.

A FEW REASONS WHY THE
AMERICAN WATCH
IS THE BEST.

It is made on the best principle, while the foreign watch is generally made on no principle at all.

Let us look at the contrast. The foreign watch is mostly made by women and boys, *by hand*. While their labor is cheap their work is dear at any price. Such watches are made without plan, and sold without guarantee. They are irregular in construction, and quite as irregular in movement. They are designed only to sell, and the buyer is the party most thoroughly sold. Those who have kept "anchres," "lepines" and "Swiss levers" in professional repair for a few years will appreciate the truth of our statement.

The plan of the American Watch.

Instead of being made of several hundred little pieces, screwed together, the body of the American Watch is formed of *solid plates*. No jar interferes with the harmony of its working, and no sudden shock can throw its machinery out of gear. Secession of one part from another is unknown to its constitution, and in riding or any other business pursuit, it is all held together as firmly as a single piece of metal. It is just what all machinery should be—

1st. *Accurate.*
2d. *Simple.*
3d. *Strong.*
4th. *Economical.*

We not only secure *Cheapness* by our system but *Quality*. We do not pretend that our Watch can be bought for less money than the foreign *make-believes* but that for its real value it is sold for one half the price.

Our Soldier's Watch (named Wm. Ellery) as what its name indicates—Solid, Substantial, and always Reliable—warranted to stand any amount of Marching, Riding or Fighting.

Our next higher quality of watch (named P. S. Bartlett) is similar in size and general appearance, but has more jewels, and a more elaborate finish.

Our Ladies' Watch, recently brought out, is put up in a great variety of patterns many of them of rare beauty and workmanship, is quite small, but warranted to *keep time*.

Our Young Gentleman's Watch is neat, not large and just the thing for the pocket of Young America.

The proof of the merits of our Watch may be found in the fact that we now employ over five hundred workmen in our factories, and that we are still unable to supply the constantly increasing demand.

Our three-quarter plate watch is thinner and lighter than the others we have described. Its fine chronometer balance is delicately adjusted to correct the variations caused by changes of temperature. These watches are chronometrically rated, and are the fruits of the latest experiments in chronometry and are made by our best workmen, in a separate department of our factory. For the finest time keeping qualities they challenge comparison with the best works of the most famous English and Swiss makers.
