

Speaking of PUBLIC SAFETY

Edmond C. Powers, traffic accident and crime analyst of Cleveland, O., asserts that both accident toll and street crimes continue to rise because of faulty illumination of streets and thoroughfares.

The Cleveland analyst cites studies which show:

1. 55 percent of fatal traffic accidents occur at night when only 25 percent of the nation's vehicles are operating.
2. 50 percent of night traffic accidents are chargeable to unsafe visibility for modern vehicle operating speeds on existing thoroughfares.
3. 22 improvements in visibility by relighting brought a 68 percent reduction in night traffic fatalities.
4. Applying a conservative 50 percent reduction to the nation's night accident experience indicates a possible yearly saving of 10,000 lives, 370,000 injuries and a billion dollars of economic loss.
5. Safe visibility for modern traffic at night can be provided most economically by modern illuminating engineering. Costs would be less than one half of one year's accident toll for cities the lighting cost would be \$2.20 to \$3.17 per capita per year; for expressways and critical areas of rural roads from \$2822 to \$3073 per mile, depending upon requirements.

Reporting police chief comment from leading cities, Powers says banishing darkness by illumination protects the public, particularly women and children, from criminal attacks at night.

Powers is a member of Federal, state and local committees working to reduce traffic accidents and crime.
